Purpose of this manual

The main purpose of this manual is to enable MyDueLog users to use every feature of the app correctly, safely, and effectively.

After carefully studying all the instructions included in this manual, the user will:

- To understand the entire operating process of the app,
 - To manage data correctly,
 - To use reports and analysis,
 - To keep data safe,
 - To use synchronization,
 - To solve common problems,
 - And you will be able to fully utilize all the major features of the app.
-

Important Information

This manual is the official user guide for MyDueLog.

The instructions, rules, validation, and procedures included in it are prepared based on the functionality of the respective app.

Some features, user interface, or operating procedures may change when a new version of the app is released. In such cases, it is recommended to use the updated version of this manual.

Part 1: Introduction, account management, and the process of using the app for the first time

1. Introduction

1.1 What is MyDueLog?

MyDueLog It is a smart financial management (Personal Finance & Expense Management) app developed to manage the daily financial activities of individuals, families, shops, and small businesses.

Through this app, users can systematically store their daily income, expenses, borrowings, loans, installments, cash balances, bank accounts, bills and vouchers, budgets, various financial reports, and analyses.

The aim of the app is to transform paper accounting into a secure, organized, fast, and digital system.

1.2 Key features of the app

The following key features are available in MyDueLog.

- User Account Creation Facility.
- Secure Login and Logout.
- Password Reset facility.
- Easy switching feature for multiple user accounts.
- Party (customer, supplier, partner or other person) management.
- Income and expense record keeping facility.
- Borrowing, lending and loan management.
- Calculation with interest.
- Installment Management.
- Cash and various account management.
- Inventory (Goods/Stock) Management.
- Bill and voucher photo storage facility.
- Summary of the entire financial situation through the dashboard.
- Various types of reports and charts.
- Budget management.
- Upcoming Due Reminder |
- Party Statement |
- Cash In Hand Report |
- Expense Analysis |
- Data Backup and Sync via Firebase.
- Support for both Nepali (BS) and English (AD) date systems.

- Facility to use Nepali and English languages.
-

2. When using the app for the first time

When opening the app for the first time, users will need to log in using their account or create a new account.

If you have already created an account on MyDueLog, you can log in directly.

If you are a new user, you will first need to sign up and create a new account.

3. How to create a new account (Sign Up)?

If you are using MyDueLog for the first time, follow the steps below.

Step 1

Open the app.

The Login Screen will initially appear.

The one at the bottom of it "**Create New Account / Sign Up**" Click on.

Then a new registration form will open.

Step 2

Fill in the following details correctly in the new form.

- Full Name
 - Email Address
 - Password
 - Confirm Password
-

Step 3

Password rules

The following rules are mandatory to keep your password secure.

- Password at least **6 letters or numbers** Who should be.
- You must re-enter the password you entered above in Confirm Password.
- Password and Confirm Password must match.

If the password does not match or does not meet the required criteria, the registration process will not proceed.

Step 4

Accept the Terms and Privacy Policy.

Before registering, please click on the form below.

"I accept the terms and conditions and privacy policy."

You must tick the checkbox.

If you want to read the terms and privacy policy, you can read the full details by clicking on the link there.

You cannot register without selecting the checkbox.

Step 5

After filling all the details correctly

Register

Click on the button.

Once the registration is successful, your new user account will be created.

Special Notice

If an account has already been created on MyDueLog with the email address you used, a new account will not be created.

In this case, the app will inform you that the email address is already registered and suggest you log in with that email address.

4. Process of logging into old account

If you have already created an account on MyDueLog, follow the steps below.

Step 1

Open the Login Screen.

Step 2

Your registered

- Email Address

And

- Password

Enter.

Step 3

"Login"

Click on the button.

If the details are correct, the app's main dashboard will open.

5. If you forget your password (Forgot Password)

If you cannot remember your password, you can create a new password.

Step 1

On the Login Screen

"Forgot your password?"

(Forgot Password)

Click on.

Step 2

Then a new dialog box will open.

Write your registered email address there.

Step 3

Send

Click on the button.

Step 4

A password reset link will be sent to your email.

You can set a new password using this link.

6. Additional information regarding login

MyDueLog securely stores your login session on your mobile.

Reasons for this:

- There is no need to log in again every time you open the app.

- No need to keep typing the password over and over again.
 - The app opens quickly.
 - The secure session remains intact.
-

7. Permissions required when using the app for the first time

Some features of MyDueLog may require permissions from your mobile device to use them.

These permissions are only requested when using the relevant feature.

7.1 Storage / Photo Permission

The app may ask for Storage or Photo permissions to protect Data Backup, Bill Photo, Profile Photo, or other images.

Some photography features cannot be fully used without this permission.

7.2 Contacts Permission

When adding a new party, the app may ask for Contacts permission so that contacts saved on the mobile can be used directly.

After granting this permission, when adding a party, the name and phone number can be easily selected from the mobile's contact list.

8. What to do next?

After successfully creating an account and logging in, you can use the app. **Main Dashboard** You enter.

From there you can:

- Dashboard

- Party Management
- Transactions
- Reports
- Profile
- Settings
- Gallery
- Budget
- You can use all features including Sync.

Part 2: Main Dashboard and Navigation Guide

This section describes in order all the main menu, navigation, shortcut and dashboard related features that appear after the user successfully logs in to the app. All the details included in this chapter have been reorganized based on the content in the original manual. No feature has been removed.

1. Main Dashboard

After successful login, the main page (Dashboard) of the app opens. This Dashboard is the center (Home Screen) of MyDueLog, from where all the main features of the app can be used.

The Dashboard provides an overview of the user's entire financial situation and quick access to all other modules.

From this location, the user can:

- Party Administration
 - Income and Expense Management
 - Reports
 - Gallery
 - Budget
 - Settings
 - Profile
 - You can use all features including Data Sync.
-

2. Dashboard Structure

The dashboard is mainly divided into the following parts.

- Bottom Navigation
- Top Options Menu
- Navigation Drawer (Side Menu)
- Dashboard Report Shortcut
- Quick Navigation

A detailed description of each part is given below.

3. Bottom Navigation

The Bottom Navigation Bar at the bottom of the screen is the most used navigation in the app.

It includes three main menus.

3.1 Dashboard

This is the main Home Screen of the app.

By clicking on it, the user can see a summary of their entire financial situation.

Specifically on this Dashboard:

- Income Report
- Expense Report
- Saving Summary
- Cash Flow
- Various Graphs
- Financial Analysis

Details such as are available.

Detailed information about Dashboard Reports is described in the Reports chapter.

3.2 Party

This menu is used by the user to manage regular business contacts, customers, shops, suppliers, or other individuals.

From this section the user can:

- Add a new Party
- Find a party
- To edit a party
- Remove Party
- To view the account by party

You can.

All details regarding the Party are explained in the Party Management chapter.

3.3 Transactions

This menu is used to manage daily financial transactions.

From this:

- Add Income
- Add Expense
- To view old transactions
- To edit a transaction
- To remove a transaction

It's over.

A detailed description of this is included in the Transactions Management chapter.

4. Options Menu in the upper right corner

Additional management features can be accessed from the Menu (Three Dots or related icon) in the upper right corner of the Dashboard.

The following options are available under this menu.

4.1 Profile

This option allows users to view and manage their personal details.

This usually includes the following details.

- Full name
- Email Address
- Profile Photo

Full details about profiles are given in the Profile Management chapter.

4.2 Settings

Various settings of the app can be changed from this option.

Through Settings:

- Manage essential app options
- Language change
- Other Configurations

Features such as can be used.

This is explained in detail in the Settings chapter.

4.3 Reports

From this option, the user can view all financial reports.

Various types of reports are available under this.

Such as:

- Dashboard Report
- Expense Report
- Cash In Hand Report
- Party Statement

- Smart Analysis
- Other financial analyses

Detailed descriptions of all these are given in the Reports chapter.

4.4 Gallery

If the user has saved photos of the bill or voucher while making a transaction, all those photos can be viewed in one place through the Gallery.

From the Gallery:

- To view bill photos
- Open in Full Screen
- To share

It's over.

A detailed description of this is given in the Bills Gallery chapter.

4.5 Sync Data

This option is used to back up the user's important data.

It:

- Financial records
- Photo
- Other necessary information

Helps keep it safe in the cloud.

Important Information

When using Data Sync, the app may ask for permission to access your mobile's storage or photos.

If permission is not granted, some backup-related features may not be available.

Full details about Sync are given in the Sync Management chapter.

4.6 Logout

This option allows the currently logged in user to securely log out of their account.

After logging out, you will need to log in to use the app again.

5. Navigation Drawer (Side Menu)

The Navigation Drawer opens when you tap the Menu Icon in the upper left corner of the screen or swipe right from the left edge of the screen.

This drawer contains the main management options.

5.1 Account Switching (Switch Account)

If more than one user account is used on the same mobile, this option can be used to easily switch to another account.

This feature is especially useful in the following situations.

- Separate household account
- Separate account for the shop
- Separate business account
- Personal account

Accounts can be changed without having to repeatedly enter the password for each account.

5.2 Add User Account

If a new user needs to be added, another user account can be added from this location.

You can switch between those accounts later if needed.

5.3 User Guide

If you have difficulty using any feature, you can view the app's entire User Manual from this option.

This manual provides detailed information about each feature of the app.

5.4 Terms & Privacy Policy

From this option the app:

- Terms & Conditions
- Privacy Policy

Can be read in full.

The terms accepted when creating an account can be reviewed from this location.

5.5 Developer Information

This option allows you to contact the app developer.

The following methods may be available under Developer Information.

- Facebook
- YouTube
- TikTok
- GitHub
- Email

Suggestions, problems, or other information can be sent through these channels.

6. Contact Import feature

When adding a new party, the app may ask for Contact Permission so that the name and phone number can be used directly from the contacts saved on the mobile.

If permission is granted:

- The Contact List will open.
- The name of the required person can be selected.
- Name and Phone Number will be filled in automatically.

This makes the process of adding a party quick and easy.

7. Next step from Dashboard

From the Dashboard, the user can initiate the following tasks as per their needs.

- Adding a new party
- Recording Income
- Expense recording
- View Reports
- Open Gallery
- Budget management
- Changing your profile
- Data Backup and Sync
- Switching to another account

Since the Dashboard is the main gateway to the entire app, all other chapters provide detailed descriptions of the tasks that begin here.

8. What next?

After understanding the basic structure of the Dashboard, the next step is Party Management.

Because most financial transactions are related to some individual, customer, supplier, or organization.

Therefore, Part 3 will cover the following topics in order.

- What is a Party?
- How to add a new party?
- Importing a Party from Contacts
- Setting a profile photo

- Search
- Filtering
- To Give / To Receive / Settled सूची
- Party editing
- Party removal
- What gets deleted when a party is deleted?
- All related validations, notes and precautions

Part 3: Party (Person/Client) Management

1. What is a Party?

In MyDueLog, a Party means any person, customer, supplier, shopkeeper, friend, relative, or organization with whom you regularly conduct financial transactions.

If you have someone:

- You have lent,
- You have borrowed,
- You have given a loan,
- You have taken a loan,
- You have done cash transactions,
- Have you bought or sold goods,

Then, a separate description of that person can be kept as a Party.

It keeps all of each person's accounts separate and secure.

2. Objectives of Party Management

The main purpose of using Party Management:

- Keep a separate account for each person.
- Knowing who owes money.
- Knowing who owes money.
- Keeping a history of all transactions.
- Ability to create PDF Statement.

- Keep track of loans and interest.
 - Making it easier to prepare reports in the future.
-

3. How to add a new Party?

It is advisable to register the details of a new person or customer before doing business with them for the first time.

To do this, follow the steps below.

Step 1

From Bottom Navigation

Party

Open the menu.

Step 2

At the bottom right of the screen

"+" (Add New Party)

Click on the button.

Then the form to register a new party will open.

Step 3

Fill in the required details.

The following details are available when adding a new Party.

Full name

This is the most important detail.

You write the correct name of the person concerned.

Phone Number

The phone number is also a mandatory detail.

This will help with future contact and party identification.

Feature to select name from Contact

If you have given Contact Permission on your mobile,

When you start typing a name, you can select a name and number from your contacts on your mobile.

In this case:

- **The name is automatically filled in.**
- **The phone number is also automatically filled in.**

This eliminates the need to type all the details manually.

Email Address

If necessary, the email address of the person concerned can be included.

This is not mandatory.

Address

The person's address can be kept.

This is also an optional detail.

Relation

You can keep track of what the person is like.

Example:

- Customer
- Supplier
- Friend
- Relative
- Business Partner

Other relationships can also be used as needed.

Note

If you want to preserve additional information about the person concerned, you can write a note.

Example:

- Special deal
 - Transactional Notes
 - Other necessary information
-

4. Put a profile photo

You can also add a photo to the party's profile to make it easier to identify.

For this:

Click on the Camera Icon at the top.

Then:

- Camera
- Gallery

You can choose a photo from.

Premium feature

The Party Profile Photo feature may fall under the Premium Feature.

If the Free Version is being used, the corresponding Premium notification may appear.

5. Save the party

After filling all the details correctly

Save

Click on the button.

After the save is successful, the party will start appearing in the main list.

6. Party List

All the parties you have added appear as a list on the main Party Screen.

From this list:

- See all parties
- To search
- To filter
- To open details
- To edit
- To remove

It's over.

7. Party Search

If there are multiple parties, the Search feature can be used to quickly find the person you need.

At the top of the screen

Search Name

Type the person's name in the box.

As you type, only matching parties will appear in the list.

8. Party Filter

A filter feature is available to view the Party List in a more organized manner.

Three main filters can be used for this.

8.1 To Give

When using this filter

People you owe money to

They only appear.

It is marked with the color red.

8.2 To Receive

When using this filter

People you owe money to

They only appear.

It is marked with the color blue.

8.3 Settled

When using this filter

Who has no remaining accounts,

Only such parties are visible.

It is marked with the color green.

9. View Party Details

Clicking on any party in the list opens the detailed ledger for that person.

From there:

- **entire business**
- **Remaining amount**
- **Loan**
- **Interest**
- **Statement**
- **Payment History**

Can be viewed.

A detailed description of this is given in the next chapter, Party Transactions.

10. Party Edit (Update)

If any party details need to be changed:

Step 1

Click on the relevant party.

Step 2

Change the necessary details.

Example:

- Name
 - Phone Number
 - Email
 - Address
 - Relation
 - Note
 - Profile Photo
-

Step 3

Update

Click on the button.

After updating, the new details are saved immediately.

11. Delete Party

A party can be removed if it is not needed.

For this:

- Long press on Party.

or

- Use the available Delete option.

Then Delete Confirmation may appear.

After approval, the relevant party is removed.

12. Important Warning

⚠ Think carefully before deleting a party.

Because when a party is deleted, all information related to it is permanently deleted.

This usually includes the following details.

- Complete Payment Record
- Complete Transaction History
- Cash Flow Records
- Related financial statements

These details cannot be retrieved after deletion.

13. Suggestions regarding Party Management

When adding a party, try to:

- Use the correct name.
- Keep the correct phone number.
- Do not create a double party for the same person.
- Use Note only when necessary.
- Make it a habit to have a party before starting a business.

This makes all subsequent reports, statements, and calculations more organized.

14. What next?

Once the Party is successfully created, the actual transaction (Ledger) begins.

In the next part, we will look at the details of Party Transactions.

It will include all of the following topics in order:

- Party Ledger
- Balance Card
- To Give / To Receive
- Change Party
- Loan Report
- PDF Reminder

- WhatsApp Share
- Transaction List
- Search Transaction
- Payment In
- Payment Out
- Update Transaction
- Delete Transaction
- Balance Calculation
- Goods
- Loan
- Installment
- Interest
- All Validation
- सबै Technical Logic

Part 4: Party Ledger (Payment Details) and Account Management

1. What is Party Ledger?

Once you add a party, all financial transactions related to that person are saved in the Party Ledger.

A Party Ledger is the main page of all the accounts held by that person or organization.

From this place you can:

- View all transactions
- Check the remaining balance
- To give new money or goods
- To receive money or goods
- To view loan reports
- To send PDF Statement
- To edit old transactions
- To remove a transaction

You can.

For this reason, the Party Ledger is considered the main financial account (Main Ledger) of the relevant Party.

2. How to open a Party Ledger?

Click once on the relevant person from the Party List.

Then that person's Party Ledger opens.

In this Ledger, all the details related to that party are available in one place.

3. Structure of Party Ledger

The Party Ledger is generally divided into the following parts.

- Header
- Profile Information
- Balance Status
- Loan Report
- Reminder
- Transaction Search
- Transaction List
- Action Buttons

Now let's look at each part in detail.

4. Profile Information

Basic information about the relevant party is displayed at the top of the screen.

This usually includes:

- Profile Photo
- Party Name

Shown.

This gives the user clear information about whose Ledger they are viewing.

5. See Profile

Under the name of the party

See Profile

Clicking on opens the detailed personal details of the respective party.

From there, you can view profile information if needed.

6. Change Party

You can view another party's ledger without leaving the party ledger.

To do this, use the Dropdown (Arrow) Icon in the upper right.

Then the Change Party Dialog opens.

From this dialog:

- To select another party
- Open that party's ledger immediately.

It's over.

There is no need to return to the main party list for this.

7. Balance Status

The most important part of the Party Ledger is the Balance Status.

It instantly shows the current balance.

Balance can be of three types.

7.1 To Give

If you owe money to the relevant party

To Give

It appears in red.

This indicates your remaining liability.

7.2 To Receive

If money is yet to be received from the relevant party

To Receive

It appears green in color.

This shows the amount remaining to be collected.

7.3 No Remain

If there are no outstanding accounts

No Remain

Appears in gray color.

This means:

- No amount is due.
 - No amount is due.
 - The account has been fully settled.
-

8. Loan Reports

If an interest-bearing loan transaction has been made with the related party

Loan Reports

Card is available.

By clicking on it, you can see all the details related to the interest.

This report generally:

- Principal
- Interest Rate
- Deposit interest
- Amount paid
- Remaining amount

Details such as are available.

Detailed information regarding Loan Calculation is explained in the Payment chapter.

9. Sending reminders

You can send your account to the relevant party through the Party Ledger.

For this

Send Reminder

The button is used.

What happens when you send a reminder?

After clicking Send Reminder, the app will:

- Collects details of the entire Ledger.
- It creates a PDF statement of it.
- Prepares to send to the relevant party.

Send via WhatsApp

If WhatsApp is available on the mobile, the PDF Statement can be sent directly through WhatsApp.

Sending by other means

If WhatsApp is not available, the app shows other sharing applications available on the mobile.

Example:

- Email
- Messenger
- Bluetooth
- Other Sharing Applications

Users can send their statements by selecting the appropriate medium.

10. Transaction Search

If there are multiple transactions with the same party, the Search feature is available to quickly find the required transaction.

For this

Search Transactions

Use the box.

When you type the required details or name there, only the transactions that match appear in the list.

11. Transaction List

Below the Search Box, all transactions with the relevant party appear sorted by date.

From this list:

- To view transactions
- To edit a transaction
- To remove a transaction

It's over.

This list is the entire financial history of the respective party.

12. Edit Transaction

If there is an error in a transaction

Click once on the relevant transaction.

Then the Update Screen opens.

From there, the necessary details can be changed.

Full details regarding the update are given in detail in the next chapter.

13. Delete Transaction

If a transaction needs to be removed

Long click on the relevant transaction.

Then the Delete option appears.

After confirming Delete, the transaction is deleted.

14. Starting a new business

There are two main action buttons at the bottom of the Party Ledger.

This is where the actual calculation begins.

Gived

If you:

- You have given money,
- You have given the goods,
- You have lent,

If

Gived

Use the button.

This opens the Payment Out Screen.

Received

If you:

- Received money,
- Received the goods,
- Repaid the loan,

If

Received

Use the button.

This opens the Payment In Screen.

15. Things to consider when using Party Ledger

- Make sure the correct party is selected before starting the transaction.
 - It is advisable to make new transactions only after checking the balance status.
 - Please check that the calculation is correct before sending the reminder.
 - Update incorrect transactions immediately.
 - Do not delete transactions unless necessary.
-

16. What next?

The actual transaction (Payment Entry) now begins with the Party Ledger.

The next part will include all the following topics in order.

Payment In (Received)

- Bill Number
- Date
- Payment Type
- Payment Method
- Add Account
- Payment For
- Loan
- Interest Rate
- Installment
- Add Goods
- Initial Stock
- Goods Validation
- Total Goods Cost
- Input Currency
- Total Amount
- Bill Photo
- Premium Feature
- Save Process
- Loading Screen
- Back Button Lock
- All Validation

- All Technical Rules

Part 5: Receiving money or goods (Payment In / Received)

1. What is Payment In?

Payment In is the process of recording the details of receiving money, goods, or a loan from a party.

For example:

- The customer paid the loan.
- Someone returned the loan.
- Loan installment received.
- Interest received.
- Goods purchased.
- Cash received.

Received is used in all such cases.

2. How to open Payment In Screen?

To open Payment In:

1. Open the Party List.
2. Select the relevant Party.
3. Open Party Ledger.
4. Click the Received button below.

Then the Payment In Screen will open.

3. Structure of Payment In Screen

The following details are filled in this screen.

- Bill ID
 - Date
 - Payment Type
 - Payment Method
 - Payment For
 - Interest Rate
 - Installment
 - Goods
 - Currency Amount
 - Total Amount
 - Bill Photo
-

4. Bill Number (Bill ID)

Each transaction has its own unique Bill Number.

This number is automatically created by the app.

This usually includes:

payment_ + समय (Timestamp)

Used.

Important

- You cannot change the Bill ID yourself.
 - The Bill ID is different for each transaction.
 - The same Bill ID cannot be used for two transactions.
-

5. Transaction Date

Today's date is automatically set when opening a new transaction.

Date according to user settings:

- AD (English Date)

or

- BS (Nepali Date)

It may appear in .

Validation

Date is required.

Date format:

yyyy-MM-dd

Must be.

6. Payment Type

Payment In Screen मा

Payment Type स्वतः

PAY_IN

It stays.

This cannot be changed.

This indicates that this transaction has been received.

7. Payment Method

Information about the account to which the received amount was deposited is kept here.

Example:

- CASH
 - Bank
 - Sewa
 - Khalti
 - Other Accounts
-

Add a new account

If the required account is not in the list

From the dropdown

Add New

You can choose.

Then the Add New Account dialog opens.

Adding a new account

Mandatory Details:

Account Name

Alternative description

- Account Number
 - Opening Balance
-

Validation

- Account Name is mandatory.
- An existing account name cannot be reused.

After saving, the new account is immediately available in the Payment Method list.

8. Payment For

Here you must select the purpose for which the amount received is intended.

There are two main options.

Borrow / Credit

If it is a general lending or borrowing transaction

Borrow / Credit

Choose.

In this case, the additional field related to Interest is not visible.

Loan

If this is an interest-bearing loan transaction

Loan

Choose.

A new field opens as soon as you select Loan.

9. Interest Rate

After selecting a loan

Interest rate is mandatory.

Validation

Interest Rate

Greater Than Zero

Must be.

If the interest rate is blank or 0, the transaction will not be saved.

10. Installment

If the transaction is to be done in installments

Repayment Mode मा

INSTALLMENT

Choose.

Then three more details are mandatory.

Interval

Select the interval at which you want to take the installment.

Available Options:

- **Monthly**
 - **Trimonthly**
 - **Quarterly**
 - **Biannually**
 - **Annually**
-

Installment Amount

The amount of each installment is kept here.

Validation

Installment Amount

Must be greater than 0.

Start Date

The installment start date must be entered.

This is also a mandatory detail.

11. Adding Goods

If goods have been received along with the money

Add Goods

Use the button.

Two different situations can occur after this.

12. When adding goods for the first time (Initial Stock)

If the inventory is empty

Add Initial Stock Dialog

Opens.

The following details are filled in.

Goods Name

Name of the goods.

Validation

- Mandatory.
 - The name cannot be repeated with previous items.
-

Unit

Example:

- Kg
- Ltr
- Pcs

It is mandatory.

Quantity

Initial Stock.

Validation

Must be greater than 0.

Cost Price

Purchase price.

Validation

Must be greater than 0.

Sell Price

Selling price.

Validation

Sell Price

Cannot be less than the cost price.

That is,

Sell Price $\geq$ Cost Price

Must be.

The main Goods Dialog opens only after saving.

13. In case of already existing inventory

If there are items in Inventory

Directly

Add Goods Dialog

Opens.

Goods Name

Auto Complete feature is available.

As soon as you type the name, a list of items in the Inventory appears.

Quantity

The quantity of goods traded.

Validation

Must be greater than 0.

Cost Price

Payment In ₹

Cost Price can be changed.

Sell Price

Payment In ₹

Sell Price Field Locked (Disabled) हुन्छ।

This cannot be changed.

14. If you find new items

If the Goods Name is not listed in the Inventory

Add New Stock Confirmation Dialog

Opens.

This

"This is not in stock list"

The message shows.

Then

- Unit
- Quantity

- Cost Price
- Sell Price

You can register a new stock by filling it out.

Its validations are the same as Initial Stock.

15. Amount Calculation

After adding goods

Total Goods Cost

The app calculates automatically.

The user only needs to enter the cash amount (Input Currency).

Input Currency

The cash received is kept here.

Total Amount

Based on Goods Cost and Cash Amount

Total Amount

Calculated automatically.

Validation

Total Amount

Must be greater than 0.

16. Bill Photo

If you want to keep a photo of the bill or voucher safe

Photo Section can be used.

Premium Feature

This feature may only be available to Premium Users.

If a Free User clicks on a photo

Premium Feature Only

A dialog may appear.

17. Save the transaction

After all the details are complete

Save

Click on the button.

What happens when you save?

After saving, the app:

- Checks the transaction.
- Ensures validation is complete.
- Starts saving data.

Then

Please Wait

A loading screen appears.

security arrangements

While data is being saved

Mobile

Back Button temporarily disabled

Yes.

Its purpose:

- Preventing the problem of half the transactions being secured.
- Don't let the ledger get damaged.
- Safeguard cash flow and stock flow.
- Ensure that incomplete data does not enter the database.

Only after the process is complete does the app return to the previous screen and the new transaction appears in the Ledger.

What next?

After Payment In is completed, the next chapter will cover the entire process of Payment Out (Given).

Then Update Transaction, Goods Edit, Temp Stock Flow, Auto Recalculation and all related technical logic will be included sequentially.

Part 6: Payment Out / Given

1. What is Payment Out?

Payment Out is the process of securing a record of the payment of money, goods, or credit to a party.

This is accessed through the **Given** button in the **Party Ledger**.

Example:

- When selling goods to a customer on credit.
- When giving someone cash.
- When providing a loan.
- When giving a loan.
- When spending cash (party related).

Payment Out is used in all these situations.

2. How to open the Payment Out Screen?

To use **Payment Out**:

1. Open the **Party List**.
2. Select the relevant **Party**.
3. Open **Party Ledger**.
4. Click the **Given** button below.

The **Payment Out** screen will then open.

3. Details available on the Payment Out Screen

The following details are usually filled in this form.

- **Bill ID**
- **Date**
- **Payment Type**
- **Payment Method**
- **Payment For**
- **Interest Rate**
- **Installment**

- Goods
- Currency Amount
- Total Amount
- Bill Photo

While most of these details are similar to Payment In, there are some important differences, which are explained in detail below.

4. Bill Number (Bill ID)

Every transaction has a separate bill number.

This app creates it automatically.

Features

- Each Bill ID is unique.
 - The user cannot change.
 - The same Bill ID cannot be used for two transactions.
-

5. Transaction Date

The current date is automatically entered when creating a new transaction.

Date:

- AD (English Date)

or

- BS (Nepali Date)

It may appear in .

Validation

- Date is required.
- The date format should be yyyy-MM-dd.

6. Payment Type

Payment Out Screen मा

Payment Type स्वतः

PAY_OUT

It stays.

This cannot be changed.

This indicates that this transaction is an outbound transaction.

7. Payment Method

Here you need to select which account the given amount came from.

Example:

- Cash
- Bank
- Sewa
- Khalti
- Other Accounts

If the required account is not in the list, a new account can be added using Add New.

Its rules are similar to the Add New Account Dialog used in Payment In.

8. Payment For

The purpose of the transaction is selected here.

Available options:

- Borrow / Credit
 - Loan
-

Borrow / Credit

Used for general borrowing or lending.

In this case, an additional field related to Interest is not required.

Loan

If an interest-bearing loan is provided

Loan

Choose.

After selecting the loan, the Interest related field opens.

9. Interest Rate

After selecting a loan, the interest rate becomes mandatory.

Validation

Interest Rate

Greater Than Zero

Must be.

If the interest rate is 0 or zero, the transaction is not safe.

10. Installment

If the amount is to be refunded in installments

Repayment Mode मा

INSTALLMENT

Choose.

Then the following details must be filled in.

Interval

- Monthly
- Trimonthly
- Quarterly
- Biannually
- Annually

Installment Amount

Installment amount.

Validation:

Must be greater than 0.

Start Date

Installment start date.

This is also mandatory.

11. Giving Goods

If goods are given along with cash

Add Goods

Use the button.

12. Special rules regarding goods in Payment Out

This part is the most different from Payment In.

When Goods are added to Payment Out,

Cost Price cannot be changed by the user.

The app automatically uses the Cost Price saved in Inventory.

Cost Price

This field is Locked (Disabled).

The app automatically takes the average purchase price (Average Cost Price) from Inventory.

The user cannot edit it.

Sell Price

Payment Out मा

Only the Sell Price can be changed.

This represents the actual selling price.

Validation

Sell Price

Cannot be less than the cost price.

Namely:

$\text{Sell Price} \geq \text{Cost Price}$

Must be.

13. Quantity

The quantity of goods to be given is entered here.

Validation

Quantity

Must be greater than 0.

14. Goods Name

When starting to write the Goods Name

The list of items in the inventory is displayed via Auto Complete.

From there, you can select the necessary items.

15. Amount Calculation

After selecting the goods

The total price of the goods is automatically calculated.

If cash is also included, then the total transaction amount is prepared by adding that as well.

Currency Amount

The cash amount given is kept here.

Total Amount

Adding goods and cash

Total Amount is automatically calculated.

Validation

Total Amount

Must be greater than 0.

16. Bill Photo

If a bill or voucher related to a transaction needs to be kept safe, a bill photo can be added.

Premium Feature

This feature may be available to Premium users.

When a Free user tries to use Bill Photo

Premium Feature Only

A notification may appear.

17. Save the transaction

After all the details are complete

Save

Click on the button.

What does the app do when saving?

After saving, the app:

- All validation checks.
- Starts to secure the transaction.
- Ready to update stock details.
- Prepares to update Ledger and Cash Flow.

Then

Please Wait

A loading screen appears.

security arrangements

While saving

- The Back Button is temporarily disabled.
- The process does not stop halfway.
- The problem of half the data being saved does not arise.
- Ledger, cash flow, and stock accounts remain secure.

The new transaction appears in the Ledger only after the process is complete.

18. The main difference between Payment In and Payment Out

Subject	Payment In	Payment Out
Type of transaction	Receiving money or goods	Giving money or goods
Payment Type	PAY_IN	PAY_OUT

Cost Price	Can be changed.	Cannot be changed (automatically taken from Inventory)
Sell Price	Locked	User can change
Stock Effect	Goods are added to stock.	Goods are out of stock.
Objective	Receive	Payment or Delivery (Give)

19. What next?

Once a new transaction is secured through Payment In and Payment Out, it may need to be edited in the future.

For that, the Update Transaction feature is available in MyDueLog.

The next part will cover all the following topics in order:

- Update Transaction Screen
- Bill ID Lock
- Edit Process
- Temp Stock Flow
- Goods Edit
- Goods Delete
- Auto Recalculation
- Ledger Rebuild
- Cash Flow Update
- Stock Flow Update
- security arrangements
- Loading Screen
- Back Button Lock
- Complete Technical Logic

Part 7: Update Transaction and Auto Recalculation

1. What is Update Transaction?

Sometimes, after a transaction has been saved, it may be necessary to correct any details in it.

For example:

- Incorrect amount entered.
- Incorrect date selected.
- Incorrect Payment Method selected.
- The quantity of goods is incorrect.
- Wrong interest rate.
- Installment details need to be changed.

In such cases, you can correct an old transaction using Update Transaction instead of creating a new transaction.

2. How to edit a transaction?

To edit a transaction:

1. Open the related Party Ledger.
2. Go to Transaction List.
3. Click once on the transaction you want to edit.

Then the Update Transaction Screen opens.

3. Details available on the Update Screen

When the Update Screen opens, all previously saved details are automatically displayed.

This usually includes the following information.

- Bill ID
- Date
- Payment Method
- Payment For
- Interest Rate

- Installment
- Goods
- Currency Amount
- Total Amount
- Bill Photo

The user can change these details as needed.

4. Why can't I change my Bill ID?

Update Screen ढ

Bill ID Locked (Disabled)

It stays.

This cannot be changed.

Reason

The Bill ID is the unique identity of the transaction.

If it is allowed to change:

- The ledger may be damaged.
- Cash flow related calculations may not match.
- Stock records may be corrupted.
- There may be a problem with Cloud Sync.

Therefore, the Bill ID is always kept fixed.

5. Editable details

Most details can be changed except for Bill ID.

Example:

- Date
 - Payment Method
 - Payment For
 - Interest Rate
 - Installment
 - Currency Amount
 - Goods
 - Quantity
 - Cost Price (if necessary)
 - Sell Price (as per rules)
 - Bill Photo
-

6. Goods editing

If the transaction includes Goods, that can also be edited.

To do this, use the Edit option in the Goods List.

When editing goods

Previously saved:

- Goods Name
- Quantity
- Cost Price
- Sell Price

Automatically appears.

This can be changed as needed.

Validation

All previous rules still apply when editing goods.

Such as:

- Quantity must be greater than 90.
 - Cost Price must be greater than 0.
 - The selling price cannot be lower than the cost price.
-

7. Removing Goods

If the added goods are not needed, they can be removed.

The relevant goods can be removed using the Delete option in the Goods List.

8. What is Temp Stock Flow?

The most important feature of Update Transaction

Temp Stock Flow

yes.

When the Update Screen opens,

The app does not change previously saved Goods details to Live (Original) Stock.

Instead,

First, a copy is made to Temporary Stock (Temp Stock Flow).

The user can then edit safely.

Why is Temp Stock Flow necessary?

Its main objectives:

- Keep the original stock safe.
- Prevent data corruption during editing.
- Do not make permanent changes until the final save.
- The original stock should be safe in case of incorrect editing.

9. What does the app do when updating?

After the user presses the Update button, the app doesn't just work like a normal Save.

This recalculates the entire transaction.

Step 1

Previous transactions are identified.

Step 2

Old transaction records are deleted.

Step 3

The old Stock Flow associated with it is removed.

Step 4

Old cash flow calculations are removed.

Step 5

The new details in Temp Stock are used.

Step 6

New business is rebuilt.

Step 7

The ledger is recalculated.

Step 8

Stock is updated again.

Step 9

Cash Flow is re-created.

Step 10

Balance is recalculated.

Only after this is the new details permanently saved.

10. Auto Recalculation

When updating, the app recalculates the entire calculation.

This

Auto Recalculation

It is said.

Reasons for this:

- The ledger does not break.
 - The loan remains valid.
 - Interest is recalculated correctly.
 - Stock remains correct.
 - Cash flow is available.
 - Incorrect data is not included in reports.
-

11. Ledger Rebuild

After the update, the Ledger is re-created according to the new details.

Reasons for this:

- The old balance disappears.
 - A new balance is created.
 - The remaining amount is updated immediately.
-

12. Stock Flow Update

In case of changes related to goods:

- The old Stock effect is removed.
- The new Quantity is applied.
- New Cost related effects apply.
- New Sell related effects apply.

This way, the inventory always remains accurate.

13. Cash Flow Update

If the cash amount in the transaction has changed

Cash Flow is also updated automatically.

It:

- Related Account Balance
- Running Balance
- Cash Report

It affects everyone immediately.

14. Loan Or Interest Update

If the transaction is loan related:

- Interest is recalculated.
 - The remaining principal is recalculated.
 - Loan Report is updated instantly.
-

15. Safety Mechanism

The app takes many security measures when updating.

After the update starts:

- The loading screen appears.
- A Please Wait message appears.
- The Back Button is temporarily disabled.
- The user cannot stop the process midway.

This eliminates the possibility of incomplete data being saved.

16. After the update is successful

After the update process is successfully completed:

- New transactions appear in the Ledger immediately.
- Balance changes automatically.

- Cash Flow is updated.
 - Stock is updated.
 - Loan and interest are recalculated.
 - New details also start appearing in related reports.
-

17. Things to consider when updating

- Bill ID cannot be changed.
 - Please double-check the details before updating.
 - Do not close the app while the update is in progress.
 - Do not use the Back Button until loading is complete.
 - When changing goods, recheck the quantity and rate.
-

18. What next?

So far we have understood the entire transaction process related to the Party:

- Party Management
- Party Ledger
- Payment In
- Payment Out
- Update Transaction

Now in the next step, we will systematically cover the dialog boxes used in all of them. These dialogs were repeated in many places in the original manual. Now each dialog will be placed in order according to its actual use.

The next part will include all of the following:

- Add New Account Dialog
- Add Initial Stock Dialog
- Add Goods Dialog
- Add New Stock Confirmation Dialog
- Edit Goods Dialog
- Category Dialog
- Budget Dialogue
- All related validations and rules

Part 8: Dialog Box (Helper Window) and Assistant Management

1. What is a Dialog Box?

MyDueLog has a provision to open an additional window smaller than the main screen to add, edit, or confirm any new information.

This is called a dialog box.

Purpose of using Dialog Box:

- Keeping the main screen clean.
 - Ask for only necessary information.
 - Enter data correctly.
 - Preventing false information from being saved.
-

2. Add New Account Dialog

2.1 Objective

If the bank, wallet, or other account required for payment is not available in the list, a new account can be added from this dialog.

This dialog usually opens after selecting Add New when selecting a Payment Method.

2.2 Available details

Account Name

New account name.

Example:

- Cash
 - NIC Asia Bank
 - Global IME Bank
 - Sewa
 - Khalti
-

Validation

- Account Name is required.
 - The same name cannot be used repeatedly.
-

Account Number

If necessary, you can enter your bank account number.

This is an Optional Field.

Opening Balance

The initial amount in the account is placed here when you open it.

Save

After saving, the new account will immediately appear in the Payment Method list.

3. Add Initial Stock Dialog

3.1 Objective

If there is no item in the Inventory, this dialog opens when adding goods for the first time.

The purpose of this dialog is to start Inventory.

3.2 Goods Name

Name of the goods.

Validation

- Mandatory.
 - Cannot be repeated with the previous name.
-

3.3 Unit

A unit of measurement for goods.

Example:

- Kg
 - Gram
 - Liter
 - Pcs
 - Box
 - Packet
-

Validation

Unit is mandatory.

3.4 Quantity

Initial stock quantity.

Validation

Must be greater than 0.

3.5 Cost Rate

Purchase price per unit.

Validation

Must be greater than 0.

3.6 Sell Rate

Selling price per unit.

Validation

Sell Rate

Cannot be less than the Cost Rate.

That is,

Sell Rate $\geq$ Cost Rate

Must be.

3.7 Save

After saving, the first item is registered in the Inventory.

Only then can the main Goods Dialog be used.

4. Add Goods Dialog

This is the most commonly used dialog.

This adds goods to any transaction.

Goods Name

When starting to write the Goods Name

Items in the inventory are visible through Auto Complete.

Quantity

The quantity of goods traded.

Validation

Must be greater than 0.

Rate rules

The behavior of the Goods Dialog varies depending on the type of transaction.

Payment In

- Cost Price can be changed.
 - Sell Price is Locked.
-

Payment Out

- Cost Price is Locked.
 - Selling price can be changed.
-

Validation

In both cases

Sell Price

Cannot be less than the cost price.

Amount

Based on Quantity and Rate

Amount is automatically calculated.

The user does not have to calculate separately.

5. Add New Stock Confirmation Dialog

Objective

If the Goods Name is not found in the Inventory when you type it, this dialog opens.

This allows the user

"This is new stuff"

It gives information.

Available details

- Unit
 - Quantity
 - Cost Price
 - Sell Price
-

Validation

All the rules of this dialog

Initial Stock Dialog

They are like.

Save

After saving:

- New stock is added to Inventory.
 - It is also used in the same business.
-

6. Edit Goods Dialog

Objective

This dialog opens if it is necessary to change the goods added to the transaction.

Details that appear automatically

Previously saved while editing:

- Goods Name
- Quantity
- Cost Price
- Sell Price

They are automatically filled.

Details that can be changed

- Quantity
 - Cost Price (if necessary)
 - Sell Price
-

Validation

- Quantity must be greater than 90.
 - Cost Price must be greater than 0.
 - The selling price cannot be lower than the cost price.
-

Save

After saving, the old Goods Record is replaced with the new details.

7. Category Dialog

Objective

If the required category is not available for the transaction, a new category can be added from this dialog.

Category Name

Example:

- Salary
 - Rent
 - Grocery
 - Food
 - Fuel
 - Education
-

Validation

Category Name is mandatory.

Category Image

If necessary, you can add an icon or photo of the category.

Premium Feature

Category Image feature may be available to Premium users.

8. Budget Dialogue

Objective

This dialog is used to set a monthly or annual spending limit for a category.

Category

You must select the previously created Category.

Monthly Budget

Monthly spending limit.

Yearly Budget

Annual spending limit.

Save

If a budget already exists for that category, it is updated with the new amount.

Otherwise, a new budget is created.

9. General Validation regarding Dialog

Some basic rules apply equally to all dialogs in MyDueLog.

- A required field cannot be left blank.
 - The amount cannot be 0 or negative.
 - Quantity must be greater than 90.
 - Duplicate accounts are not accepted.
 - Duplicate goods are not accepted.
 - Duplicate categories are not accepted.
 - The selling price cannot be lower than the cost price.
 - It will not be saved until validation is complete.
-

10. Dialog related security

When saving from the dialog, the app:

- Checks all information.
- Tests whether validation is complete or not.
- Prevents incorrect data from entering the database.
- Dialog closes only after success.

This helps maintain data accuracy.

11. What next?

So far we have understood the entire process related to the Party:

- Party Management
- Party Ledger
- Payment In

- Payment Out
- Update Transaction
- Dialog Management

Now we will move beyond party-based transactions and move towards general income and expense management (Transactions Management).

The next part will include all of the following topics:

- Transactions Dashboard
- Income Management
- Expense Management
- Transaction Filter
- Search
- Duration Filter
- Add Income
- Add Expense
- Category Selection
- Member Selection
- Transaction including Inventory
- Edit Transaction
- Delete Transaction
- Transaction Filter Dialog
- All related Validation and Technical Rules

Part 9: Transactions Management

1. What is Transactions Management?

Transactions Management is a system for systematically recording daily financial activities (income and expenses) outside of the party.

With this you can:

- To record daily income
- To record daily expenses
- To keep track of the category
- To manage funds according to the payment method
- To trade with inventory
- To find old transactions

- To edit
- To remove

You can.

2. How to open the Transactions Screen?

Located in the Bottom Navigation

Transactions

Click on the menu.

The main Transactions Dashboard will then open.

3. Transactions Dashboard

The top part of the Transactions Screen shows a summary of the current financial situation.

It usually has the following details available.

Total Income

Total Income recorded so far.

Shown in green.

Total Expense

Total Expenses incurred so far.

Shown in red.

Savings (Net Balance)

Difference between Income and Expense.

This shows the actual savings (Net Balance).

4. Search Transaction

If there are many transactions, the Search feature can be used to quickly find the required transaction.

In the Search Box:

- **Name**
- **Description**

Only matching transactions will be displayed as you type.

5. Filter transactions

Various filters can be used on the Transactions screen.

It only shows the transactions for the required period.

Duration Filter

Transactions can be viewed by duration.

Example:

- **Daily**
 - **Weekly**
 - **Monthly**
 - **Yearly**
-

Previous

Used to view the previous period.

Example:

If Monthly is selected, pressing Previous opens the details for the previous month.

Next

Used to view the next period.

It shows details for the next day, week, month or year respectively.

Advanced Filter

When you click on the Filter Icon

Transactions Filter Dialog

Opens.

A detailed description of this is given in the last part of this chapter.

6. Adding a new transaction

Two types of transactions can be made from the Transactions Dashboard.

Add Income

If the money has arrived

Add Income

Use it.

Add Expense

If money has been spent

Add Expense

Use it.

7. Income व Expense Form

The following details are filled in the form that opens when adding Income or Expense.

- Category
 - Payment Method
 - Amount
 - Member
 - Date
 - Goods (if necessary)
 - Bill Photo
-

8. Select Category

Every transaction should be placed under some category.

Example:

Income:

- Salary
- Business
- Investment
- Interest

Expense:

- Food
- Rent
- Fuel

- Education
 - Shopping
-

Validation

Category selection is mandatory.

Transactions cannot be saved without selecting a category.

Add a new category

If the required category is not in the list

A new category can be created using the Category Dialog.

A detailed description of this is given in the Dialog chapter.

9. Payment Method

Here you need to select which account the money came from or went from.

Example:

- Cash
- Bank
- Sewa
- Khalti

If the required account is not available, a new account can be added.

Its rules apply according to the Add New Account Dialog.

10. Amount

The transaction amount is kept here.

Validation

Amount

Must be greater than 0.

0 or negative amounts are not accepted.

11. Member

Information can be kept about which member this transaction belongs to.

Example:

- Family
- Friends
- Relatives

Other members may also be selected as needed.

12. Transaction Date

The Date Field is mandatory.

Date:

- AD
- BS

Can be used on both systems.

Validation

Date format:

yyyy-MM-dd

Must be.

13. Turnover including Inventory

If the transaction also involves goods

Add Goods

The button can be used.

Adding Goods

All rules regarding Goods:

- Quantity
- Cost Price
- Sell Price
- Validation
- Amount Calculation

The same applies as described in Section 5 (Payment In) and Section 6 (Payment Out) of this booklet.

Those rules are not repeated in this chapter.

14. Bill Photo

If a bill or voucher related to a transaction needs to be kept safe, a bill photo can be added.

Premium Feature

The Bill Photo feature may only be available to Premium users.

Free users may see Premium notifications when using the app.

15. Securing transactions

After all the details are complete

Save

Click on the button.

While saving

The app:

- Validation checks.
- Secures business.
- Updates the related account.
- Updates inventory if necessary.
- Prepares data for reports.

The transaction then appears in the list successfully.

16. Edit Transaction

If any transaction needs to be corrected

Click on the relevant transaction in the list.

Then the Update Screen opens.

The entire update process is described in detail in Part 7 of this manual.

17. Delete Transaction

If a transaction needs to be removed

Long press on the relevant transaction.

Then the Delete option appears.

After confirming Delete, the related transaction is deleted.

18. Transactions Filter Dialog

When you click on the Filter Icon

Transactions Filter Dialog

Opens.

This allows a large number of transactions to be selected based on need.

Available Filters

Time Range

The following options are available.

- ALL
 - DAILY
 - WEEKLY
 - MONTHLY
 - YEARLY
 - CUSTOM
-

Calendar Mode

The date system can be selected.

- AD (English date)
 - BS (Nepali Date)
-

Category Filter

Only transactions in a specific category can be viewed.

Apply Filter

After applying the filter, the app queries the database and displays only the transactions based on that basis in the list.

19. When the transaction is being saved or updated

If a transaction is being saved or updated

Please Wait

If the message appears:

- Do not close the app.
- Don't use the Back Button.
- Wait until the process is complete.

This helps keep accounts safe.

20. What next?

So far, we have completed daily transaction management.

In the next part, we will study the Bills Gallery in detail.

It will include the following topics:

- Bills Gallery
- Thumbnail View
- Source Filter
- Party Filter
- Type Filter
- Full Screen View
- Zoom feature
- Share
- Photo Close
- Firebase Backup
- Photo Sync
- AD/BS Date Display
- Technical Logic

Part 10: Bills Gallery (Bills and Voucher Gallery)

1. What is Bills Gallery?

The feature that allows you to view bills, vouchers, or other related photos saved while transacting on MyDueLog in one place is called Bills Gallery.

This makes it easy for users to search for, view, and share old bills with others if needed.

2. How to open Bills Gallery?

To open Bills Gallery:

- Select Gallery from the top Options Menu.

or

- Open the Bills Gallery from the relevant Reports section.

The Gallery screen will then open.

3. Gallery Screen

When the Gallery opens, all the bill and voucher photos appear in a list.

Each photo usually has:

- Thumbnail
- Transaction date

Shown.

This helps you quickly identify the required bill.

4. Thumbnail View

In Gallery, all photos are initially displayed in small size (Thumbnail).

From this:

- Multiple photos can be viewed at once.
 - The required photo can be easily identified.
-

5. Smart Filter

If multiple bill photos are saved, various filters are available to quickly find the required photo.

6. Source Filter

This filter allows you to select the source of the photo.

Available options:

- SOURCE (all)
 - PAYMENT
 - TRANSACTION
-

SOURCE

All types of bills and photos are displayed.

PAYMENT

Only the bill related to Party Payment is shown.

TRANSACTION

Only bills related to general income or expenses are shown.

7. Party Filter

If PAYMENT is selected in the Source Filter

Party Filter can be used.

From this:

Only bills related to a specific party can be viewed.

This makes searching easier in cases where there are many parties.

8. Type Filter

Photos can also be selected according to the type of business.

Available options:

- IN
 - OUT
-

IN

Only the bill related to income or received is visible.

OUT

Only Expense or Given Bills are visible.

9. Combined Filter

Source Filter, Party Filter, and Type Filter can be used at the same time.

Example:

- PAYMENT
- Party = Ram
- Type = IN

If selected, only bills received from the relevant party will be displayed.

15. Full Screen View

When clicking on any thumbnail

That photo opens in full screen.

From this, the photo can be seen clearly.

11. Zoom feature

Full Screen View में

The PhotoView feature is used.

It:

- Zoom In with two fingers
- Zoom Out

Allows.

This helps you read bills clearly, even those with small print.

12. Bill Sharing

In full screen

Share

Bill can be sent to another person using the button.

Example:

- Email
 - Messenger
 - WhatsApp
 - Bluetooth
 - Other Sharing Applications
-

13. Close Gallery

After seeing the bill

Close

You can return to the Gallery list by pressing the button.

14. Technical Logic Regarding Bill

Photos displayed in Bills Gallery are not searchable directly from mobile.

The app creates a Gallery using the Photo Path (URI) stored in the Database.

It:

- Correct photo
- right business

It is displayed together.

15. Database relationship

The information displayed in the Bills Gallery is related to the Bill Record stored in the Database.

Reasons for this:

- The wrong bill will not open.
 - Business and photos are related to each other.
 - When you delete or update, the Gallery is also updated.
-

6. Firebase Backup

If the user has Data Synced

Bill's photos can also be backed up to Firebase.

Reasons for this:

- When changing mobile
- When reinstalling the app

- When logging in to a new device

Bills can be retrieved.

17. Photo Synchronization

Bill related photos are part of the Data Sync process.

When syncing:

- New photo is uploaded.
 - The required photo is downloaded.
 - Gallery is updated.
-

18. Date Display

Transaction date visible in Gallery

It is displayed according to the Calendar Mode selected by the user.

If:

- AD is used if the English date.
- BS is used if Nepali date.

Automatically displayed.

19. Color Indication

The date associated with the bill appears in a different color depending on the type of transaction.

Income (IN)

Green

Expense (OUT)

Red

This helps to immediately identify the type of transaction.

20. After Bill Delete or Update

If the related transaction:

- Updated
- Deleted

The Gallery also updates automatically.

This prevents the problem of old or mismatched photos appearing.

21. Things to keep in mind when using Bills Gallery

- Keep the necessary bill safe.
 - Take a clear photo of the bill.
 - Sync data from time to time.
 - Search using filters.
 - You can zoom in to full screen to check the details.
-

22. What next?

So far we have:

- Party Management
- Party Transactions

- **Payment In**
- **Payment Out**
- **Update Transaction**
- **Dialog Management**
- **Transactions Management**
- **Bills Gallery**

We studied all the information related to.

Now the next chapter will cover Budget Management.

It will cover all the following topics in detail:

- **Budget Dashboard**
- **Budget List**
- **Search Budget**
- **Add Budget**
- **Monthly Budget**
- **Yearly Budget**
- **Category Budget**
- **Category Icon**
- **Budget Status**
- **SAFE**
- **WARNING**
- **CROSSED**
- **Firebase Sync**
- **Budget Validation**
- **Technical Rules**

Part 11: Budget Management

1. What is Budget Management?

Budget Management helps you keep your spending under control.

You can set a separate budget for each spending category. The app then compares that budget with actual spending and provides necessary warnings and analysis.

This feature:

- **To control unnecessary expenses,**

- To spend in a planned manner,
- To find out whether the budget has been exceeded,
- To plan monthly and annual expenses

Helps.

2. Budget Dashboard

When you open the Budget Menu, all budgets appear as cards.

Each card shows the budget for the respective category and its current status.

Even if you have a large budget, you can easily view it through the Card Layout.

3. Search Budget

You can quickly find any budget using the Search Box at the top of the Dashboard.

This helps you quickly find the budget for a specific category.

4. Adding a new budget

To add a new Budget:

1. Open the Budget Dashboard.
2. Click on the Floating Action Button (FAB) on the screen.

The Add Budget dialog will then open.

Important

If no category has been created, a new budget cannot be added.

Therefore, the relevant category must be created before creating a budget.

5. Budget Form

The following details are filled in when adding a new Budget.

- Category
 - Monthly Budget
 - Yearly Budget
 - Category Image (Premium)
-

6. Category Selection

Budget is always related to a single category.

Example:

- Food
- Rent
- Fuel
- Education
- Shopping
- Salary

Select the required Category from the already created Category list.

7. Monthly Budget

This determines the maximum amount of money you can spend in a category within a month.

Example:

Food = Rs. 15,000

The app then compares this with the actual spending in the same category.

8. Yearly Budget

The annual spending limit for the same category can also be determined separately.

Example:

Food = Rs. 1,80,000

9. Category Icon वा Photo

You can add an icon or photo to easily identify the category.

To do this, click on the Photo Icon and select a picture from the Camera or Gallery.

Premium Feature

The Category Image feature may only be available to Premium users.

If you are using the Free Version, a Premium notification may appear.

10. Save the budget

After filling all the details

Save

Click on the button.

If the budget already exists

If a budget for the same category has already been saved, a new budget will not be created.

Instead, the old budget is updated according to the new details.

11. Budget Status

Once the budget is ready, the app compares it with actual spending and shows its status.

Three types of status are available.

SAFE

If the actual expenditure

Less than 80% of budget

If yes

Status:

SAFE

Shown.

The color green is usually used.

This means that the expenditure is within safe limits.

WARNING

If the expenses

80% to 100% of budget

If it has reached the middle

Status:

WARNING

Shown.

Orange is usually used.

This indicates that the budget is about to run out.

CROSSED

If the actual expenditure

If it exceeds the budget

Status:

CROSSED

Shown.

Red is usually used.

This indicates that the budget has been exceeded.

12. How is the budget calculated?

The app compares the actual spending for each category with the corresponding budget.

By comparison:

- **SAFE**
- **WARNING**
- **CROSSED**

The appropriate status is determined.

This information is also used in later reports.

13. Database related arrangements

When you save each budget, its details are saved in the database.

Budget related information:

- Category
- Monthly Budget
- Yearly Budget
- User details

Kept safely.

Each user can only see their own budget.

14. Firebase Synchronization

Budget information is also saved in the Cloud if Data Sync is used.

Reasons for this:

- Budgets can be retrieved when logging in to a new mobile.
 - Synchronization is required between local and cloud.
-

15. When logging in to another device

If the user logs in on another device

The app:

- Local Data
- Firebase Data

Compares between.

If necessary, the local database is updated by downloading the new Budget from the Cloud.

16. Use in Budget Report

Budget-related information is not only used on the Budget Screen.

This information:

- Dashboard Report
- Expense Report
- Smart Analysis

It is also used in.

Based on this, the app analyzes the spending situation.

17. Budget Validation

The following rules apply when saving a budget.

- Category selection is mandatory.
 - Category must be created first.
 - A separate new budget is not created for the same category.
 - Saving may update the old budget.
 - Each budget is saved only in the associated user's account.
-

18. Tips for using Budget

- Start your budget with the category that costs the most.
- Re-review the budget every month.
- Try to control spending as soon as you see a **WARNING**.
- Plan ahead to avoid getting **CROSSED**.
- Sync data regularly.

19. What next?

After Budget Management comes the most powerful part of the app — Reports & Financial Analysis.

In the next chapter, we will study the following topics in order.

- Dashboard Report
- Summary
- Quick Actions
- Charts & Graphs
- Budget Status Report
- Loan Summary
- Account Summary
- Upcoming Dues
- Common Reports
- Smart Analysis

Part 12: Dashboard Report and Financial Overview

1. What is a Dashboard Report?

The Dashboard Report is the most important report in MyDueLog.

It provides a summary of your entire financial situation in one place.

From this report you can:

- Current income
- Current expenses
- savings
- Cash balance
- Amount to be taken
- Amount to be paid
- Budget situation

- **Loan status**
- **Account Summary**
- **Upcoming Dues**
- **Various graphs and charts**

You can watch from one place.

2. How to open Dashboard Report?

To open a Dashboard Report:

- **Open Dashboard from Bottom Navigation.**

or

- **Select Reports from the top Options Menu.**

The Dashboard Report will then open.

3. Structure of Dashboard Report

The Dashboard Report is divided into different sections.

This mainly includes:

- **Summary**
- **Quick Actions**
- **Charts**
- **Budget Status**
- **Loan Summary**
- **Account Summary**
- **Upcoming Dues**
- **Common Reports**

are included.

Now let's look at each part in detail.

4. Summary (Summary of financial statements)

Summary shows a short but important description of your current financial situation.

This includes the following information.

4.1 Amount to be received (Receivable)

The total amount outstanding to be collected from others.

This shows the amount you should receive in the future.

4.2 Amount payable (Payable)

The total amount owed to others.

This shows your financial responsibility.

4.3 Total Stock / Available Balance

You currently have available:

- Cash
- Bank
- digital wallet
- Other Accounts

Shows the total balance in .

4.4 Details of the current month

Current month:

- Total income
- total expenses
- Total savings

Shown separately.

This makes it easy to understand the current month's financial situation.

5. Expense Analysis

The dashboard compares current spending with the previous month.

It:

- Did the expenses increase or decrease?
- What percentage has changed?

Shows information that.

Financial Health

The app also shows financial health based on spending status.

Generally:

- Good
- Normal
- Warning

One of the following situations appears.

This helps users understand their spending status.

6. Quick Actions

New records can be added directly from the Dashboard.

Quick Action Buttons are available for this.

New Account

Add a new bank, cash or other account.

New Party

To add a new customer or person.

New Income

To record income.

New Expense

To record expenses.

New Category

Create a new business category.

Using Quick Actions opens the corresponding form directly.

7. Charts And Graphs

The financial situation is visually presented through various graphs on the dashboard.

This also helps to understand large data easily.

8. Income vs Expense Chart

This is usually shown as a line chart.

It:

- Income
- Expense
- Saving

Shows the change over time.

This makes it easy to understand when expenses increased or income decreased.

9. Expense Category Pie Chart

This is shown as a Pie Chart.

It:

It shows what percentage was spent in which category.

Example:

- Food
- Rent
- Fuel
- Education
- Shopping

The percentage of categories like this is clearly visible.

Top Categories

Pie charts typically show the top 7 categories with the most spending.

This helps identify areas where there is a lot of spending.

15. Cash Flow Chart

This chart shows:

- Cash In
- Cash Out

Shows a comparison of.

You can also compare it with the previous month's Cash Flow.

This makes it easier to understand the movement of money.

11. Budget Status

If a budget has been set, its status is visible on the Dashboard.

Three types of status are available.

SAFE

Expenditures less than 80% of budget.

Green

WARNING

Expenses between 80% and 100% of the budget.

Orange

CROSSED

Expenses exceed budget.

Red

12. Loan Summary

If a loan-related transaction has been made, its summary is displayed on the Dashboard.

This usually includes:

- Loan given
- Loan taken
- Principal paid
- Interest paid
- Remaining Principal
- Remaining Interest

Information is available.

This allows you to understand the overall status of the loan.

13. Accounts Summary

The dashboard also shows a summary of all financial accounts.

For each account:

- In
- Out
- Balance

Shown separately.

Example:

Account	In	Out	Balance
Cash	Rs. 50,000	Rs. 20,000	Rs. 30,000
Bank	Rs. 2,00,000	Rs. 50,000	Rs. 1,50,000

This provides clear information about how much money is left in which account.

14. Upcoming Dues (Dashboard Shortcut)

The dashboard also shows information about the amount that needs to be paid or withdrawn within the next 15 days.

In it:

- Two Dates
- Party Name
- Amount

Shown.

If a due date has passed, it is shown separately as Overdue.

15. Common Reports Shortcut

Other reports can also be opened directly from the Dashboard.

Available Shortcuts:

- All Transactions
- Party Statement
- Cash In Hand
- Smart Analysis

This helps you open the required report quickly.

16. Language change

The language of the app can be changed if the user wishes.

Available Languages:

- Nepali
- English

When you change the language, the entire app, including the Dashboard, appears in the same language.

17. Tips for using the Dashboard

- Make it a habit to check the Dashboard regularly.
 - Pay attention to the budget status.
 - Manage overdue amounts on time.
 - Analyze spending trends using charts.
 - Make financial decisions by looking at the summary.
-

18. What next?

The Dashboard Report shows a summary of the overall financial situation.

A detailed analysis of the Expense Report will now be presented in the next chapter.

It will include all of the following topics:

- Expense Report Dashboard
- Filter
- Time Range
- Category Filter
- Summary Block
- Pie Chart
- Timeline Chart

- Budget Block
- Time Pattern
- Recurring Expenses
- Smart Analysis
- Technical Logic
- Data Aggregation
- Budget Calculation
- Category Marker
- All View Types

Part 13: Expense Report

1. What is an Expense Report?

Expense Report provides a detailed analysis of your daily, weekly, monthly, and annual expenses.

It not only provides a list of expenses, but also provides analysis of spending trends, budget status, recurring expenses, spending over time, and financial behavior.

From this report you can:

- Where is the most spending happening?
- Which category has the most expenditure?
- Are expenses increasing or decreasing?
- Whether the budget has been exceeded or not,
- Which expenses are recurring,

You can easily get that information.

2. How to open an Expense Report?

To open Expense Report:

- Select Expense Report from the Dashboard.

or

- Open the Expense Report from the Reports Menu.

The Expense Report Dashboard will then open.

3. Expense Report Dashboard

The Expense Report is divided into different analytical blocks.

It presents multiple types of analysis on a single page.

Main Blocks:

- Summary
 - Expense Pie Chart
 - Timeline Chart
 - Budget Status
 - Time Pattern
 - Recurring Expenses
 - Smart Analysis
-

4. Report Filter

You can apply the necessary filters before viewing the expense report.

To do this, use the Floating Action Button (FAB) at the bottom right of the screen.

The Expense Report Filter Dialog will then open.

5. Available Filters

Time Range

Reports can be viewed based on time.

Available options:

- ALL
 - DAILY
 - WEEKLY
 - MONTHLY
 - YEARLY
 - CUSTOM
-

Category Filter

Only expenses for a specific category can be viewed.

Example:

- Food
 - Fuel
 - Rent
 - Education
-

Calendar Mode

Report:

- AD (English date)

or

- BS (Nepali Date)

Can be viewed on any of the systems.

6. Apply Filter

After selecting a filter, the app:

- Searches the related transaction database.

- Only necessary expenses are incurred.
- Creates a new expense report.

After this, all charts and blocks are updated according to the new filter.

7. Summary Block

The Summary Block shows a brief analysis of all expenses.

This usually includes:

- Total income
- total expenses
- Total savings

Shown.

Expense Change

Current expenses are compared to the previous period.

It:

- Expenses increased.
- Expenses decreased.

It gives information including percentage.

Financial Health

The app shows financial health based on spending status.

Example:

- Good
- Normal
- Warning

Insight

A short insight regarding spending may also appear in the Summary Block.

This helps users understand their spending status.

8. Category Pie Chart

The main chart of the Expense Report should be a Pie Chart.

It:

Shows the spending in each category as a percentage.

Example:

- Food – 30%
- Rent – 25%
- Fuel – 10%
- Education – 6%

Etcetera.

Marker View

When clicking on any part of the Pie Chart

Of that Category:

- Name
- Amount
- Percentage

It seems.

Category Marker View is used for this.

9. Timeline Chart

The Timeline Chart shows how spending has changed over time.

It:

- daily expenses
- monthly expenses
- annual expenses

Helps with analysis.

Line Chart is used for this.

10. Budget Status Block

If the budget for the relevant category has been prepared

The Expense Report also shows its status.

SAFE

Expenditures less than 80% of budget.

WARNING

Expenses between 80% and 100% of the budget.

CROSSED

Expenses exceed budget.

This clearly shows which categories need to be controlled.

11. Time Pattern Block

This block analyzes spending patterns over time.

Specifically:

- Weekdays
- Weekend

Shows a comparison of costs.

This can help you understand when you spend more.

12. Recurring Expense Block

A list of recurring expenses is shown in this block.

Example:

- Rent
- Internet
- Electricity
- Water
- Monthly Fees

This helps avoid missing out on regular expenses.

13. Smart Analysis Block

This is the smartest part of the Expense Report.

The app studies your spending habits and makes suggestions.

Example:

- Expenses have increased a lot.
 - There has been unusual spending in a category.
 - The budget is about to be exceeded.
 - There is a possibility that savings can be increased.
-

14. Technical Logic

Expense Report is not just a report that shows a list.

It uses many types of calculations and analysis.

Date Filter Logic

The app checks the date of each transaction.

Transactions are only included in the report if they are within the selected date range.

Budget Calculation

Each category:

- Budget
- actual expenses

Comparison is made.

Then:

- SAFE
- WARNING
- CROSSED

The appropriate status is displayed.

Daily Summary

Every day:

- Income
- Expense

The daily financial situation is prepared by adding.

Monthly Aggregation

When preparing a monthly report

Daily details are aggregated.

Then a monthly analysis is prepared.

Yearly Aggregation

For the annual report

Monthly statements are re-collected.

This shows the annual spending trend.

15. Tips for using Expense Report

- View Expense Report every month.
 - Check Budget Status regularly.
 - Identify the categories with the most expenses.
 - Manage recurring expenses on time.
 - Pay attention to Smart Analysis's suggestions.
-

16. Information about Free and Premium

If you are using the Free Version

Advertisements may appear between some blocks in the Expense Report.

Typically, an advertisement may appear after every 6 or 7 blocks.

This does not affect the financial statements of the report.

17. What next?

After the Expense Report, the next important report is the Cash In Hand Report.

It will include all of the following topics:

- Cash In Hand Dashboard
 - Total Income
 - Total Expense
 - Total Balance
 - Loan Summary
 - Investment Summary
 - Account Summary Table
 - Monthly Income vs Expense Chart
 - Daily Saving Chart
 - Cash Flow Chart
 - Filter
 - Running Balance
 - Opening Balance
 - Closing Balance
 - Technical Logic
 - Account Filter
 - Data Aggregation
-

Part 14: Cash in Hand Report

1. What is Cash In Hand Report?

The Cash In Hand Report shows the current status of all your financial accounts.

This report:

- **Total income**
- **total expenses**
- **Current balance**
- **Cash Flow**
- **Details of each account**
- **Loan and Investment Status**

It presents important information in one place.

This report is especially useful for understanding your current financial position.

2. How to open Cash In Hand Report?

To open the Cash In Hand Report:

- **Select Cash In Hand from the Dashboard.**

or

- **Open the Cash In Hand Report from the Reports Menu.**

The Cash In Hand Dashboard will then open.

3. Cash In Hand Dashboard

This report includes the following main sections.

- **Summary Cards**
 - **Loan तथा Investment Summary**
 - **Account Summary Table**
 - **Charts**
 - **Filter**
-

4. Summary Cards

A summary of the financial situation is shown at the top of the screen.

This includes the following details.

4.1 Total Income

Total income received so far.

This shows the total amount received in all accounts.

4.2 Total Expense

Total amount spent so far.

It shows the sum of all types of expenses.

4.3 Balance

The current total available balance is shown based on income and expenses.

This amount can usually be seen in green or red.

5. Loan And Investment Summary

If you have made any loan or investment-related transactions, a summary of that will also appear in this report.

This usually includes:

- Total Loan
- Total Investment

Shown.

This provides information on how much money is currently borrowed or invested.

6. Account Summary Table

This is the most useful part of the Cash In Hand Report.

It shows separate details of each financial account.

For each account:

- Total amount received (In)
- Total amount spent (Out)
- Current Balance

Shown separately.

Example

Account	In	Out	Balance
Cash	Rs. 75,000	Rs. 25,000	Rs. 50,000
Bank	Rs. 3,00,000	Rs. 50,000	Rs. 2,50,000
Sewa	Rs. 30,000	Rs. 5,000	Rs. 25,000

This clearly shows how much money is left in which account.

7. Monthly Income vs Expense Chart

This chart is usually shown as a bar chart.

It:

- Previous month's income
- Previous month's expense
- Current month's income
- Current month's expense

Presents a comparison between.

This allows you to understand the monthly trend of income and expenses.

8. Daily Saving & Cash Flow Chart

This is usually shown as a line chart.

It:

- Daily Saving
- Daily Cash Flow

It shows how things have changed over time.

This helps you understand which days you have the most income or expenses.

9. Report Filter

If you need to view reports for a specific period or only for a specific account, you can use filters.

To do this, click on the Filter Floating Action Button (FAB) on the screen.

The Cash Flow Report Filter Dialog will then open.

10. Available Filters

Time Range

The report can be viewed according to the following time periods.

- ALL
 - DAILY
 - WEEKLY
 - MONTHLY
 - YEARLY
 - CUSTOM
-

Account Filter

If you want to see reports for only a specific account, you can select the account from here.

Example:

- Cash
- Bank
- Sewa
- Khalti

In this case, the details of other accounts are hidden and only the report for the selected account is shown.

Calendar Mode

Date display:

- AD (English)
- BS (Nepali)

Can be done on any of the systems.

Custom Date Range

If a report for a specific period of time is required:

- Start Date
- End Date

You can select and view the report.

11. How is balance calculated?

The Cash In Hand Report doesn't just show the total of transactions.

It also includes the opening balance of each account in the calculation.

After this:

- Amount received (In)
- Amount Out

The final balance is prepared on the basis of.

This way, no amount is left out of the calculation.

12. Running Balance

Balance automatically changes after each transaction.

This is called Running Balance.

It shows the impact of each transaction immediately.

13. Account Filter Logic

If Account Filter is used:

- Only transactions from the selected account are included in the calculation.
- Transactions from other accounts are temporarily hidden.

This makes it easy to see the actual status of any one account separately.

14. Date Filter Logic

If a specific date range is selected:

- Only transactions within the same date are included in the report.
 - Outside transactions are not included in the calculation.
-

15. Monthly Or Yearly Report

The app aggregates daily transactions when generating monthly and annual reports.

Then:

- Monthly Chart
- Annual Chart

It is prepared.

This helps analyze long-term economic trends.

6. Closing Balance

In a monthly or annual report, the balance on the last day of the relevant period is used as the Closing Balance.

Based on this, a chart and summary are prepared.

17. Data Synchronization

The Cash In Hand Report uses data from a variety of sources.

Example:

- Accounts
- Transactions
- Party Payments

Because of this, the report automatically updates as any new transaction is saved.

18. Tips for using Cash In Hand Report

- Check your balance regularly.
 - Check whether the amount in each account matches.
 - Analyze a specific period using Filter.
 - Understand income and expense trends by viewing the Monthly Chart.
 - Sync data regularly.
-

19. What next?

After the Cash In Hand Report, the next important report is the Party Statement Report.

It will cover all the following topics in detail.

- Party Statement
- Transaction History
- Net Balance
- To Receive
- To Give
- No Balance
- Interest Calculation
- Date Filter
- PDF Statement
- Share
- Final Balance Calculation

Part 15: Party Statement and Accounts Report

1. What is a Party Statement?

A Party Statement is a detailed report of all financial transactions with a single person (Party).

It shows all the information related to a particular party in one place.

From this report you can:

- Complete business history
- Current balance
- Amount to be taken
- Amount to be paid
- Loan details
- Interest related details
- PDF Statement
- Share

You can use features like.

2. How to open a Party Statement?

To view the Party Statement:

1. Open the Party List.
2. Select the relevant Party.
3. Open Party Ledger.
4. Select the Statement or Report option.

Then the statement of the concerned party will open.

3. Information to be included in the statement

Each statement typically includes the following information.

- Party Name
 - Profile Photo (if available)
 - Contact number
 - turnover period
 - Transaction List
 - total turnover
 - total amount received
 - Total amount given
 - Current Balance
-

4. Transaction History

The main part of the statement should be Transaction History.

It displays all transactions with the related party, sorted by date.

Each transaction typically:

- Transaction date
- Bill Number
- Type of transaction
- Amount
- Balance

Shown.

5. Running Balance

Balance is automatically updated after every transaction.

This is called Running Balance.

It shows how much money is left after each transaction.

6. Final Balance

The final calculation is shown in the last part of the statement.

This can be shown in three ways.

To Receive

If the amount is yet to be collected from the relevant party

To Receive

Shown.

To Give

If the amount is due to the relevant party

To Give

Shown.

No Balance

If there are no outstanding accounts

No Balance

Shown.

This indicates that both sides have settled their scores.

7. Loan Summary

If there has been a loan-related transaction with the related party

The statement also includes a loan summary.

In it:

- Principal
- Interest
- Paid Amount
- Remaining Amount

Details such as.

8. Interest Calculation

If interest is applied to the loan

Take the statement:

- Interest rate
- Deposit interest
- Interest paid
- Remaining interest

Also provides information.

It clearly shows the entire calculation of interest.

9. Statement Filter

If there are multiple years of transactions, only statements for a specific period can be viewed.

A filter feature is available for this.

Available options

- ALL
 - DAILY
 - WEEKLY
 - MONTHLY
 - YEARLY
 - CUSTOM
-

Custom Date Range

To view a statement for a specific period:

- Start date
- Deadline

You can choose.

10. Calendar Mode

Statement:

- AD (English Date)

or

- BS (Nepali Date)

Any of these can be viewed in the date system.

11. PDF Statement

The statement can be converted to PDF.

For this

Generate PDF

or

Export PDF

Use the option.

Information to be included in the PDF

In PDF usually:

- **Party Name**
- **turnover period**
- **Transaction History**
- **Running Balance**
- **Final Balance**

Includes.

This makes it easy to print or send to others.

12. Share Statement

Once the PDF is ready

Share

You can send a statement using the button.

Ways to share

- **WhatsApp**
- **Email**
- **Messenger**
- **Bluetooth**
- **Other Sharing Applications**

13. Sending reminders

If it is necessary to remind the relevant party of the remaining amount

Reminders can be sent from the statement.

It uses the prepared statement.

14. Statement Update

If a transaction has been updated later

The statement is automatically updated with new details.

Reasons for this:

- The old balance is not visible.
 - The new calculation takes effect immediately.
 - The PDF is also re-generated according to the new details.
-

15. Statement Delete related impact

If the related transaction is deleted:

- Transaction History is updated.
 - Running Balance is recalculated.
 - The final balance changes.
 - Regenerating the PDF only includes new details.
-

16. How is Final Balance calculated?

When the app creates a statement:

1. Sorts all transactions by date.
2. Calculates Running Balance after each transaction.
3. The balance remaining after the last transaction is considered the Final Balance.

Based on this:

- To Receive
- To Give
- No Balance

is determined.

17. Technical Logic

When creating a Party Statement, the app:

- Selects only the transactions of the relevant party.
- Applies Date Filter.
- Recalculates the Running Balance.
- Loan and interest are updated again.
- Uses the latest data when creating PDF.

This ensures that the Statement is always accurate and up-to-date.

18. Tips for using Party Statement

- Check the final balance before sending any statement.
 - Make sure the Date Filter is correct before sending the PDF.
 - Use the new statement instead of the old one.
 - Regenerate the PDF if necessary after updating the transaction.
-

19. What next?

The next chapter after the Party Statement is the Upcoming Dues Report.

It will include the following topics:

- Upcoming Due List
- Today
- Tomorrow
- This Week
- Overdue
- Reminder System
- Notification
- Date Calculation
- Due Filter
- Technical Logic
- Auto Reminder

Part 16: Managing Upcoming Payments and Collections (Upcoming Dues Report)

1. What are Upcoming Dues?

Upcoming Dues presents a list of amounts that are due (Payable) or receivable (Receivable) in the near future.

Its main purpose:

- Don't miss any due date.
 - Assist in collecting or paying money on time.
 - Show overdue transactions separately.
 - Assist in planning for future financial obligations.
-

2. How to open Upcoming Dues Report?

To view Upcoming Dues:

- Select Upcoming Dues from the Dashboard.

or

- Open the Upcoming Dues Report from the Reports Menu.

The Upcoming Dues Dashboard will then open.

3. Upcoming Dues Dashboard

This dashboard shows a list categorized by Due Date.

Typically includes the following sections.

- Today
 - Tomorrow
 - This Week
 - Upcoming
 - Overdue
-

4. Today

Amounts due or payable on today's date are shown here.

Each record typically contains:

- Party Name
- Two Dates
- Amount
- Payment Type

Shown.

5. Tomorrow

All dues that fall on tomorrow's date appear in this section.

This helps the user prepare a day in advance.

6. This Week

All dues falling within the current week are included in this section.

This makes it easier to make a weekly financial plan.

7. Upcoming

All dues after the current week are shown in this list.

It shows future financial obligations in advance.

8. Overdue

Transactions that have passed their due date but have not yet been completed are shown as Overdue.

These records are specifically displayed separately so that the user can pay immediate attention.

9. Information visible on each Due

Each Due Record typically includes:

- Party Name
- Two Dates
- Transaction Type

- Amount
- Remaining Balance

Shown.

The relevant Party Ledger can be opened directly if necessary.

10. Reminder system

Reminders can be sent to the relevant parties from Upcoming Dues.

When sending a reminder:

- The relevant party is selected.
 - The latest balance is used.
 - A statement can also be included if necessary.
-

11. Notification

If the Notification feature is enabled in the app

Upcoming Due notifications are displayed on time.

Example:

- It's due today.
- It's due tomorrow.
- The due date has passed.

This prevents important transactions from being missed.

12. Date Calculation

When creating Upcoming Dues, the app:

- Current date

- Two Dates

Calculates the difference between.

Then places each Due in the appropriate group.

Example:

- Today
 - Tomorrow
 - This week
 - Upcoming
 - Overdue
-

13. Due Filter

If there are many Dues, a filter can be used.

Example:

Type Filter

- To Receive
 - To Give
 - All
-

Date Filter

- Today
 - This Week
 - This Month
 - Custom
-

Calendar Mode

Date:

- AD

- BS

Can be viewed on both systems.

14. Auto Update

If any Due related transaction:

- Payment made,
- Updated,
- Deleted,

Then Upcoming Dues is automatically updated.

This ensures that you don't end up on the old Due list.

15. Loan and Installment Relationship

Loan or installment dues are also included in this report.

In it:

- Installment Due Date
- Remaining installment
- Upcoming payments

Details such as.

6. Technical Logic

When creating Upcoming Dues, the app:

- Checks all active transactions.
- Compares Due Date.
- Removes completed transactions.

- Only the remaining transactions are kept in the list.
- Categorizes by date.

This keeps the list always up-to-date and accurate.

17. Suggestions for users

- Check Upcoming Dues on the Dashboard every day.
 - Prioritize the Overdue list.
 - Send reminders on time.
 - Update the record immediately after payment.
 - Don't turn off notifications so you don't miss any dues.
-

18. What next?

All major chapters related to Reports are now complete.

The next chapter will cover Profile and Account Management.

It will include the following topics in detail:

- Profile Information
- Profile Photo
- Update Profile
- Change Password
- Change Email
- Linked Account
- Session Management
- Logout
- Account Switching
- Validation
- Security Rules

Part 17: Profile and User Account Management

1. What is Profile Management?

Profile Management provides the facility to manage all information related to a user's personal account.

With this you can:

- To view your profile
- To change personal details
- To change your profile photo
- To change password
- To manage your account
- To log out
- To switch to another account

You can.

2. How to open a profile?

To open a profile:

- Select Profile from the Options Menu at the top of the Dashboard.

or

- Open Profile from the Navigation Drawer.

The Profile Screen will then open.

3. Profile Information

The following details are typically displayed on the Profile Screen.

- Profile Photo
- Full Name

- Email Address
 - User ID (if applicable)
 - Account creation date (if available)
-

4. Profile Photo

You can put your photo on your profile to make it easier to identify.

To change photo:

1. Click on Profile Photo.
 2. Select one of the options: Camera or Gallery.
 3. Select the required photo.
 4. Save.
-

Photo related information

After the photo is saved:

- The new profile photo appears immediately.
 - In the future, data syncing can also be saved in the cloud.
 - The same photo can be used when logging in on another device.
-

5. Personal Information

The following details can be changed if necessary.

- Full Name
- Profile Photo

If the email change feature is available, the email can also be changed.

6. Change Password

If you want to change your password:

1. Open Profile.
 2. Select Change Password.
 3. Enter the current password.
 4. Enter a new password.
 5. Re-enter the new password in Confirm Password.
 6. Save.
-

Password Validation

New Password:

- Must be at least 6 letters or numbers.
 - Must match Confirm Password.
 - The password will not be changed until validation is complete.
-

7. If you forget your password

If you do not remember your current password, click on the Login Screen.

Forgot Password

Use the option.

Then:

- Enter your registered email address.
 - Get Password Reset Link.
 - Set a new password.
-

8. Email Address

The email address is the user's primary identity.

Based on this:

- Login
- Password Reset
- Data Synchronization
- Account Verification

Such tasks are completed.

So always use an active email address.

9. Linked Account

If the same user has more than one account on the same mobile, all of those accounts can be managed securely.

It:

- Personal account
- business accounts
- family accounts

Helps keep things separate.

10. Account Switching

If more than one account is available:

1. Open the Navigation Drawer.
2. Select Switch Account.
3. Select the required account.

Then the dashboard of the respective account will open.

Important

Each account must:

- Party
- Transactions
- Reports
- Budget
- Gallery

They are completely separate from each other.

Data from one account is not visible in another account.

11. User Session

After successful login, the app creates a secure user session.

Reasons for this:

- No need to log in repeatedly.
 - The app opens quickly.
 - User authentication remains secure.
-

12. Logout

If you want to exit your current account:

1. Open the Options Menu or Navigation Drawer.
2. Select Logout.
3. Accept the confirmation.

Then the current session ends.

After logout

After logging out:

- The dashboard closes.
 - The login screen opens.
 - Login is required to use the app again.
-

13. Login on another device

If you log in on a new mobile or another device:

- Use your registered email.
 - Enter the correct password.
 - After successful login, you can sync the necessary data.
-

14. Profile security rules

The app performs a security validation when changing profile information.

Example:

- Empty name is not accepted.
 - Password validation is mandatory.
 - Incorrect email format is not accepted (if the change feature is available).
 - The profile is updated only after the photo is saved.
-

15. Data Security

Information about your profile:

- Securely stored in a local database.
 - It can also be synchronized to the cloud if necessary.
 - Other users cannot see your profile.
-

16. Tips when using Profile

- Use your real name.
 - Change your password periodically.
 - Use a secure email address.
 - Do not use the same password on other services.
 - End the session only if you need to log out.
-

17. What next?

Now the user's personal account information is complete.

The next chapter will cover Settings Management.

It will cover the following topics in detail:

- General Settings
- Language Settings
- Date Format
- Notification Settings
- Theme (if available)
- Default Account
- Default Calendar
- Backup Preferences
- Sync Settings
- Validation
- System Preferences

Part 18: Application Settings

1. What are Settings?

Settings provides the ability to manage app behavior and user preferences.

With this you can:

- To change the language
- To change the date system
- To manage notifications
- To control sync options
- To change the general behavior of the app

You can.

2. How to open Settings?

To open Settings:

- Select Settings from the Options Menu at the top of the Dashboard.

or

- Open Settings from the Navigation Drawer.

The Settings screen will then open.

3. Structure of Settings

The Settings Screen typically includes the following sections.

- General Settings
 - Language
 - Calendar
 - Notification
 - Synchronization
 - Backup Preferences
 - System Information
-

4. General Settings

General Settings control basic app behaviors.

This may also include more options in the future.

5. Language Settings

MyDueLog can be used in two languages.

Available languages:

- Nepali
 - English
-

Changing language

1. Open the Language option.
2. Select the required language.
3. Save the changes.

After changing the language, all main menus, titles, and available content in the app appear in the same language.

6. Calendar Settings

The app supports two types of date systems.

- AD (Gregorian Calendar)
 - BS (Bikram Sambat Calendar)
-

Changing the calendar

Select the required date system from Calendar Mode in Settings.

After this:

- Dashboard

- Reports
- Transactions
- Party Statement
- Bills Gallery

The selected date system will be used in all locations, including.

7. Notification Settings

If the Notification feature is enabled in the app:

- Upcoming Due
- Reminder
- Other important information

Shown on time.

Enable or disable notifications

From the Notification option in Settings:

- Enable
- Disable

It can be done.

8. Default Calendar Preference

If you always want to use the same date system, you can make it the default.

After this, the same calendar is used every time you open the app.

9. Backup Preferences

If you use Data Backup, you can manage your backup preferences here.

This usually includes:

- Backup permission
- Data Synchronization Options

May be included.

10. Synchronization Settings

Data Sync behavior can also be controlled from Settings.

Through this:

- Enabling synchronization
- Re-synchronize if necessary.

You can do things like:

A detailed description of this is given in the Data Synchronization chapter.

11. System Information

General information about the app may be available at the end of Settings.

Example:

- App Version
 - Build Information
 - Developer Information
-

12. Theme (if available)

If the app has a theme change feature:

- Light Mode
- Dark Mode
- System Default

You can select any one of the themes.

If the Theme Change feature is not available, this option will not appear.

13. Default Account (if available)

If the same user has multiple financial accounts, the Default Account can be selected.

It automatically selects the same account when making a new transaction.

14. Save Settings

Some changes take effect immediately upon selection, while others may only take effect after you save.

The app may inform you if a restart is required for any changes to take effect.

15. Settings related validation

When changing settings:

- Invalid options are not accepted.
 - Calendar Mode is only active once.
 - Only one language is active at a time.
 - The current state of the notification is preserved.
-

16. Reset Settings to Default

If the Reset Settings feature is made available in the future, users will be able to return the app's personal settings to their default state.

If such a feature is not available, this option will not appear.

17. Tips when using Settings

- Select a language you feel comfortable with.
 - Check Calendar Mode regularly.
 - Don't turn off notifications, especially when using Upcoming Due.
 - If you use Data Sync, keep Synchronization enabled.
 - Update the app if a new version is available.
-

18. What next?

Now all user management is complete.

The next chapter will include a detailed description of Data Synchronization (Firebase Sync & Backup).

It will cover the following topics in detail:

- Data Synchronization
- Local Database
- Cloud Storage
- Upload
- Download
- Photo Synchronization
- Conflict Resolution
- Internet Requirement
- Manual Sync
- Automatic Sync
- Error Handling
- Security
- Technical Logic

Part 19: Data Synchronization (Data Synchronization, Backup and Restore)

1. What is Data Synchronization?

Data Synchronization (Sync) is the process of synchronizing data saved on a mobile device with data saved in the cloud.

Its purpose:

- Keeping data safe.
 - Ability to recover data when changing mobile.
 - Making the same account information available on different devices.
 - Keep photos and other necessary files safe.
-

2. Why is synchronization necessary?

If mobile:

- Lost,
- It's broken,
- Reset done,
- Had to use a new mobile,

In this case, data that is only in the local database may be lost.

Using Cloud Synchronization, necessary data can be retrieved.

3. Local Database

MyDueLog initially saves all new data to the mobile's local database.

This includes information about:

- Party
- Transactions
- Payment Records
- Accounts
- Categories
- Budget
- Basic data required for reports

Because of this, most of the app's features can be used even without the internet.

4. Cloud Synchronization

If the Sync feature is used, the necessary data is also saved in the Cloud.

Information that can be saved in the Cloud:

- User Data
- Party Information
- Transactions
- Payment Records
- Budget
- Bills Photo
- Profile Photo

This reduces the risk of data loss.

5. First-time Synchronization

After logging in to the new device:

1. User authentication occurs.
 2. Data available in the cloud is searched.
 3. The required data is downloaded to the local database.
 4. Once synchronization is complete, the app can be used normally.
-

6. Manual Synchronization

If data needs to be synced immediately, the user can perform a manual sync.

For this:

- Turn on the Sync Data option.
- Select Synchronize Now.

Then the Sync process begins.

7. Automatic Synchronization

If Automatic Synchronization is enabled:

- After the new data is saved,
- In case of need,

The app can automatically start synchronization.

This reduces the need for users to perform frequent manual syncs.

8. Upload process

If new data has been added to the Local Database, then when syncing:

- New Party
- New Transactions
- New Budget
- New Photo

Uploaded to the cloud.

The relevant data is considered updated after the upload is successful.

9. Download Process

If new data is available in the Cloud:

- Essential Records
- Related photos
- Required details

Downloaded to local database.

Reports and lists are automatically updated after the download is complete.

10. Photo Synchronization

Bill Photo and Profile Photo are also part of the synchronization process.

In it:

- New Photo Upload
- Required Photo Download
- Local Path Update

Such tasks are completed.

11. Conflict Resolution

Sometimes the same data:

- Changed to Local,
- Changes have also been made to the Cloud.

The situation may be.

In such cases, the app uses the Conflict Resolution process.

It:

- Identifies the new version.

- Uses updated data if necessary.
 - Prevents duplicate data from being created.
-

12. Internet Requirement

Internet is required for synchronization.

If the internet is not available:

- The Local Database can be used normally.
 - Synchronization can be done later.
-

13. While synchronization is in progress

After sync starts:

- Progress may be visible.
- Please wait until the process is complete.
- Do not close the app.
- Don't turn off the internet.

This prevents incomplete synchronization.

14. Error Handling

If synchronization fails:

- Check the internet.
- Retry.
- Synchronize again after some time if necessary.

If the problem persists, contact the developer.

15. Data Security

User data is exchanged securely during synchronization.

Another user cannot view or change that data without the user's permission.

16. After successful synchronization

After synchronization is successful:

- The dashboard is updated.
- Reports are updated.
- Budget is updated.
- Gallery is updated.
- The Party and Transactions list is updated.

After this, the app's local and cloud data will be in the same state.

17. Synchronization Tips

- Sync regularly.
 - Complete the sync before using the new mobile.
 - It is best to perform a manual sync after making a large change (bulk update).
 - Use stable internet.
 - Do not force close the app while syncing is in progress.
-

18. What next?

The chapters on the app's main operations, reporting, and data management are now complete.

The next chapter will include Premium Features.

It will include the following topics:

- Premium Membership
- Premium Only Features
- Photo Features
- Advanced Reports
- Advertisement
- Premium Activation
- Premium Validation
- Free vs Premium Comparison

Part 20: Premium Membership and Premium Features

1. What is Premium Membership?

Premium Membership Advanced membership facility to MyDueLog.

This allows you to use more features than the normal (Free) version.

Users with a Premium subscription can get additional features, a better experience, and an ad-free (if applicable) experience.

2. Difference between Free Version and Premium Version

MyDueLog can be used in two ways.

- Free Version
- Premium Version

The free version provides basic features, while the premium version provides additional features.

3. How to identify Premium Features?

If a feature is only available to Premium members, a Premium notification will appear in that location.

Example:

- Premium Feature Only
- Upgrade to Premium

If you see such messages, a Premium subscription may be required to use the feature.

4. Bill Photo

The feature to save a photo of a bill or voucher may be available under Premium.

If a Free user tries to use this feature, a Premium notification may appear.

Premium users can:

- Add Bill Photo
- To see
- To keep safe

You can.

5. Profile Photo

The feature of posting photos to a party or other related profile may be available in Premium.

This helps to easily identify parties.

6. Category Image

The feature of adding an icon or photo to a category may be available to Premium users. This makes the category more attractive and easily recognizable.

7. Advanced Reports

Some advanced reports available in the future may be available only to Premium members.

Example:

- Detailed analysis
- Special Chart
- Advanced Financial Insights

If such a feature is available, a Premium notification will be displayed in the relevant location.

8. Advertisement

When using the free version, advertisements may appear in some places in the app.

Example:

- Between some Report Blocks
- In other suitable locations

The purpose of advertising is to support the operation and development of the app.

What does advertising not affect?

Because of advertising:

- The data does not change.
- It does not affect the accounts.
- The report calculation does not change.

- Synchronization is not affected.
-

9. Premium Activation

If you have purchased a Premium subscription, the Premium feature is automatically activated after the relevant process is completed.

Once activated, all available Premium features can be used.

10. Premium Validation

The app checks the subscription status when using the Premium feature.

If the subscription is not active:

- Premium feature does not open.
- The relevant information is displayed.

If the subscription is active, the feature can be used normally.

11. After the Premium expires

If the Premium subscription expires:

- Premium features may be temporarily unavailable.
 - Previously saved data remains safe.
 - Basic (Free) features can be used.
-

12. What can Free users do?

Even Free users can use most of the main features of MyDueLog.

Example:

- **Party Management**
- **Transactions**
- **Reports**
- **Budget**
- **Dashboard**
- **Statements**

Basic amenities such as.

13. Additional benefits for Premium users

Premium members can use the advanced features available.

Such as:

- **Additional photo features**
- **Advanced reports (if available)**
- **Premium-only special options**

Premium features added in the future will also be available as a subscription.

14. Premium related suggestions

- **Study the available features before purchasing Premium.**
 - **Although the premium feature is not required, the main functions of the app can be performed with the free version.**
 - **Your saved data will not be lost even if Premium ends.**
 - **The app can provide necessary information if the app needs to be reopened after Premium is activated.**
-

15. General questions about Premium

Is data safe without Premium?

Yes. Your data remains safe.

Can I view the report without premium?

Basic reports are available for viewing. If a particular report is under Premium, relevant information about it is displayed.

Are photos deleted after Premium ends?

No. Previously saved data will remain safe. However, some functions that require Premium features may be temporarily unavailable.

16. What next?

After the information about Premium, the chapters about the final system of the manual now begin.

The next chapter will cover the following topics:

- Troubleshooting (Common Problems and Solutions)
- Common Error
- Login problem
- Sync issue
- Photo problem
- Report problem
- Solutions
- Frequently Asked Questions (FAQ)

Part 21: Common Problems and Solutions (Troubleshooting Guide)

1. What is Troubleshooting?

Troubleshooting is a guide to common issues that may occur while using the app, along with their possible causes and solutions.

If a feature does not work as expected, use the solutions mentioned in this chapter.

2. In case of failure to login

Possible cause

- गलत Email Address।
 - Wrong Password.
 - Problem with internet connection.
 - Account not registered.
-

Solution

- Please recheck your email address.
 - Confirm that the password is correct.
 - If you have forgotten your password, use Forgot Password.
 - Please check your internet connection and try again.
-

3. If you have not received the Password Reset Email

Possible cause

- Incorrect Email Address entered.
- Email Inbox not updated.
- Internet problem.

Solution

- Check if the registered email is used.
 - Also check your Spam or Junk folder.
 - Please try again later.
-

4. In case Data Synchronization is not successful

Possible cause

- Internet is not available.
 - Synchronization stopped in the middle.
 - Unable to connect to the cloud.
-

Solution

- Use stable internet.
 - Run Sync Data again.
 - Do not close the app until the process is complete.
-

5. In case of no Bill Photo Upload

Possible cause

- Storage or Photo Permission denied.
 - Internet is not available.
 - Photo could not be selected.
-

Solution

- Grant the necessary permission.
 - Reselect the photo.
 - Try synchronization again.
-

6. If the profile photo has not been changed

Possible cause

- No photo selected.
 - Permission not available.
 - The update process is not complete.
-

Solution

- Check Camera or Gallery Permission.
 - Reselect the new photo.
 - Update your profile again.
-

7. In case the party cannot be saved

Possible cause

- Required field is empty.
 - Validation not completed.
-

Solution

- Name is required.
 - Check Phone Number (if necessary).
 - Save only after completing all the required details.
-

8. In case the transaction cannot be saved

Possible cause

- Amount is 0 or negative.
 - Category not selected.
 - Required validation not completed.
-

Solution

- Enter the correct amount.
 - Select Category.
 - Read the validation message and make the necessary corrections.
-

9. In case the goods cannot be saved

Possible cause

- Quantity 0 available.
 - Cost Price is invalid.
 - Sell Price is lower than Cost Price.
-

Solution

- Keep the quantity greater than 90.
- Keep the cost price accurate.
- Do not keep the selling price below the cost price.

10. In case the budget cannot be saved

Possible cause

- Category not selected.
- Budget Amount is invalid.

Solution

- Select Category.
- Enter the correct budget amount.

11. When the report appears empty

Possible cause

- There are no transactions in the selected period.
- Filter is very limited.

Solution

- Remove the filter and try again.
- Change the Date Range.
- Check if the transaction is secure.

12. When Bills Gallery appears empty

Possible cause

- No Bill Photo has been saved.
 - Filter not found.
 - Photo download not completed.
-

Solution

- Remove filter.
 - Check if the related transaction has a bill photo.
 - Resynchronize if necessary.
-

13. When balance seems to be out of balance

Possible cause

- Transaction updated.
 - No transaction has been deleted.
 - Synchronization not completed.
-

Solution

- Check the related Ledger.
 - Review Transaction History again.
 - Perform data synchronization.
-

14. If the reminder is not sent

Possible cause

- The corresponding sharing application is not available.
 - The PDF could not be created.
-

Solution

- Try Reminder again.
 - Use another sharing application.
-

15. In case of no notification

Possible cause

- Notification turned off.
 - Permission is not granted in the mobile's System Settings.
-

Solution

- Enable the app's Notification Settings.
 - Check your mobile's Notification Permission.
-

16. General Tips

If any problems are not resolved:

- Restart the app.
 - Retry Data Synchronization.
 - Use the latest version of the app.
 - Contact the developer if necessary.
-

17. Frequently Asked Questions (FAQ)

Question 1: Can the app be used without the internet?

Answer: Yes. Most of the main features can be operated using Local Database. However, Internet is required for Data Synchronization and some Cloud related tasks.

Question 2: Will data be lost when changing mobile?

Answer: If data synchronization has been done, then data can be retrieved by logging in to the new mobile.

Question 3: Will data be lost after Premium ends?

Answer: No. Data remains secure. Some features that require Premium may be temporarily unavailable.

Question 4: Can multiple accounts be used on the same mobile phone?

Answer: Yes. You can switch between different accounts using the Account Switching feature.

Question 5: Is Bill Photo mandatory?

Answer: No. Bill Photo can be saved only if necessary.

18. What next?

After the Troubleshooting Guide, the final Reference chapters of the manual remain.

The next chapter will cover the following topics:

- Privacy Policy
- Terms & Conditions
- User Responsibilities
- Data Privacy
- Security
- Acceptable Use
- Disclaimer

Part 22: Developer Information and User Support

1. Introduction

Information regarding the development, maintenance, and future updates of MyDueLog is included in this chapter.

If you have any problems, suggestions, or inquiries while using the app, you can get help through the means mentioned in this chapter.

2. Developer Information

The developer of MyDueLog is responsible for developing, improving, and adding new features to the app.

The developer may from time to time:

- Bug Fix
- Performance Improvement
- Security Update
- New Features

Can provide.

3. Version Information

Each new version may include improvements and changes.

From Version Information, users can:

- Version currently in use
- New Available Version

You can get information about.

4. Application Update

It is recommended to update the app when a new version is available.

When updating, usually:

- Bug Fix
- New feature
- Security improvements
- Performance improvement

are included.

5. Things to consider when updating

Before updating:

- Perform data synchronization if necessary.
- Make sure important changes are saved.
- Use stable internet.

This helps in migrating to the new version easily.

6. Feedback

If you have any suggestions regarding the app, you can send feedback.

Example:

- Suggestions for new features.
- User Experience Suggestions.
- Matters needing improvement.

Feedback helps make future versions better.

7. Bug Report

If any bug is found in the app, the information can be provided to the developer.

When reporting a bug, it is best to include as much of the following information as possible.

- What was the problem?
- When did the problem appear?
- Which screen did it appear on?
- Whether the problem recurs or not.
- If possible, include a screenshot.

This helps resolve the problem quickly.

8. Feature Request

If you need a new feature in the app, you can send a Feature Request.

Example:

- New Report
- New Chart
- New Filter
- New Export Format
- New Language Support

The developer may include such features in future versions as needed.

9. Support Request

If the problem is not resolved through general troubleshooting, support can be requested.

When requesting support, please:

- Problem
- Version used
- Device information
- Required Screenshot

It is appropriate to provide.

10. Contact

To contact the developer, please use the official contact details provided in the app.

If in the app:

- Email: rokaya.madan22@gmail.com
- Website
- Contact Form
- Other official channels

Use the same medium if available.

11. Response Time

Support requests are reviewed as needed upon receipt.

Resolution time may vary depending on the type, complexity, and priority of the problem.

12. Bug Fixes

Developers usually resolve bugs in the following steps.

1. Getting a bug.
 2. Reproduce the problem.
 3. Identify the cause.
 4. Developing solutions.
 5. Will be made available through a new version.
-

13. New Features (Future Enhancements)

MyDueLog may evolve with more features in the future.

Example:

- More Reports
- More Charts
- More analytics
- Performance Improvements
- New financial management tools

These features may be included according to needs and development plans.

14. User Role

User feedback is important in improving the app.

You:

- Reporting problems,
- To suggest,
- Sharing ideas for improvement,

You can help make the app more useful by doing things like:

15. Suggestions for assistance

- If there is a problem, report it immediately.
 - Don't use the old version.
 - Study the Troubleshooting chapter first.
 - Please provide clear details when reporting a bug.
-

16. What next?

Now only the last chapter of the booklet remains.

The next chapter will cover the following topics:

- Technical Notes
- Validation Summary
- Common Rules
- Security Summary
- Data Flow Overview
- Appendix
- Glossary
- Final conclusion

Part 24: Technical Notes, Common Rules and Appendix

1. Introduction

This chapter covers general rules frequently applied when using MyDueLog, validation, security principles, technical notes, and the meaning of some important terms used throughout the book.

This chapter is prepared primarily for reference.

2. General Validation Rules

The following basic rules apply to most forms and dialogs in MyDueLog.

Mandatory Field

Required Field cannot be left blank.

Amount

Amount always:

Greater than 0

Must be.

Quantity

Quantity also:

Greater than 0

Must be.

Cost Price

Cost Price:

Cannot be 0 or negative.

Sell Price

Sell Price:

Cannot be less than the cost price.

Category

Category selection cannot be left blank where it is mandatory.

Date

Date must always be a valid date.

3. General rules regarding Save

When saving any record, the app:

- All validation checks.
- Completes the necessary database process.
- Updates the related report.
- Recalculates the required balance.

No record is saved until validation is complete.

4. General rules regarding updates

When updating a record:

- Old data is identified.
 - Recalculation is performed if necessary.
 - The ledger is updated.
 - Reports are updated.
 - Balance is restored.
-

5. General rules regarding deletion

When deleting:

- The related record is deleted.
- The necessary summary is re-created.
- The report is updated.
- Balance is recalculated.

The change becomes permanent only after the Delete process is complete.

6. Loading Screen

While a long process (such as Save, Update, Synchronization) is running

Please Wait

The message may appear.

At this time:

- Do not close the app.
 - Don't use the Back Button.
 - Wait until the process is complete.
-

7. Data Flow Overview

Data in MyDueLog typically operates in the following order.

1. The user enters information.
 2. Validation happens.
 3. Saved in local database.
 4. The report is updated if necessary.
 5. If synchronization is enabled, it is uploaded to the cloud.
 6. It can be downloaded to another device if needed.
-

8. General principles related to databases

Each Record:

- Associated with the respective user.
- Uses a Unique Identifier.
- Maintains necessary relationships.

This prevents incorrect records from being mixed together.

9. General rules regarding synchronization

Synchronization Garda:

- New data is uploaded.
 - The required data is downloaded.
 - Duplicate prevention process applies.
 - The latest information is prioritized.
-

10. General principles of security

The app:

- Uses user authentication.
 - Keeps each user's data separate.
 - Asks for permission where permission is required.
 - Adopts necessary security measures to prevent unauthorized access.
-

11. Performance related suggestions

To make the app work properly:

- Perform data synchronization regularly.
- Use the latest version of the app.
- Keep the required storage free.
- Don't use the old version for a long time.

12. Glossary (meaning of important words)

Account

Mode of depositing money (Cash, Bank, Wallet etc.).

Party

A person or organization with whom you have financial transactions.

Transaction

Any income or expense related transaction.

Payment In

A transaction in which money or goods are received.

Payment Out

A transaction in which money or goods are given.

Ledger

A systematic record of all accounts relating to a party or account.

Budget

Predefined spending limits.

Due

The remaining amount to be paid or collected in the future.

Balance

The current balance.

Synchronization

The process of combining data between local and cloud.

Statement

A report of all financial details related to a party.

Report

Analytical presentation of recorded data.

13. Final tip for users

- Secure transactions regularly.
 - Control spending using Budget.
 - Manage due dates.
 - Study reports regularly.
 - Don't forget to synchronize data.
 - Update the app when a new version is available.
-

14. Conclusion

MyDueLog is a financial management system developed with the aim of making the daily financial management of individuals, families, and small businesses simple, secure, and organized.

You can effectively use all the major features of the app by following the instructions contained in this manual.

The habit of regularly entering accurate data, performing timely synchronization, and analyzing available reports will help you understand your financial situation more clearly and manage it systematically.

15. Expiration of the document

This concludes the restructured version of the MyDueLog User Manual.

Final review of the restructuring

In this new structure, the manual is organized into the following main sections:

Parts 1–4: Preliminary Information

- Introduction
- How to get started
- Dashboard
- Basic operation

Parts 5–11: Core Management

- Party Management
- Payment In
- Payment Out
- Update Transaction
- Dialog Management
- Transactions
- Budget

Parts 12–16: Reports & Analysis

- **Dashboard Report**
- **Expense Report**
- **Cash In Hand Report**
- **Party Statement**
- **Upcoming Dues**

Part 17–20: User and System Management

- **Profile**
- **Settings**
- **Data Synchronization**
- **Premium Features**

Parts 21–24: Support & Reference

- **Troubleshooting**
- **Privacy Policy**
- **Developer Information**
- **Technical Notes तथा Appendix**
